COMMERCIAL PROPOSAL · SEPTEMBER 2026

SkillTrixa assessment platform.

One tenant, two workspaces. Vendor admins create every assessment type, assign classrooms and review results. Students take only what is assigned — coding, aptitude, MCQ, mixed, English, theory, SQL, system design, interviews and projects — in a secure exam.

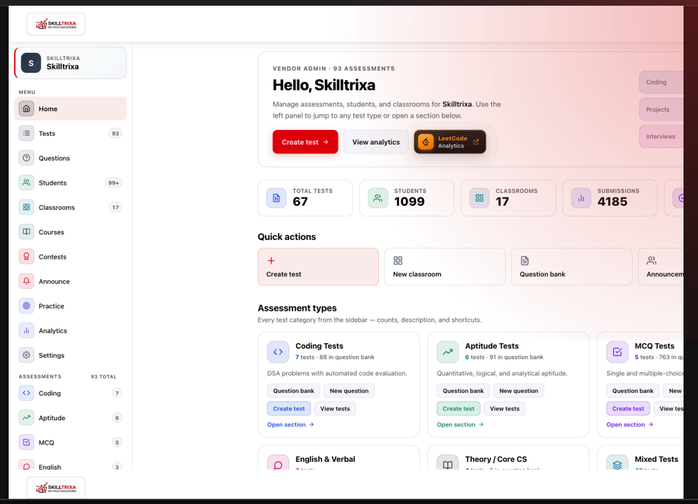

Part 02 · Vendor admin | Part 03 · Student panel | 10 test types | Coding judge | System design

Platform licence · ₹399 / student / year · GST extra

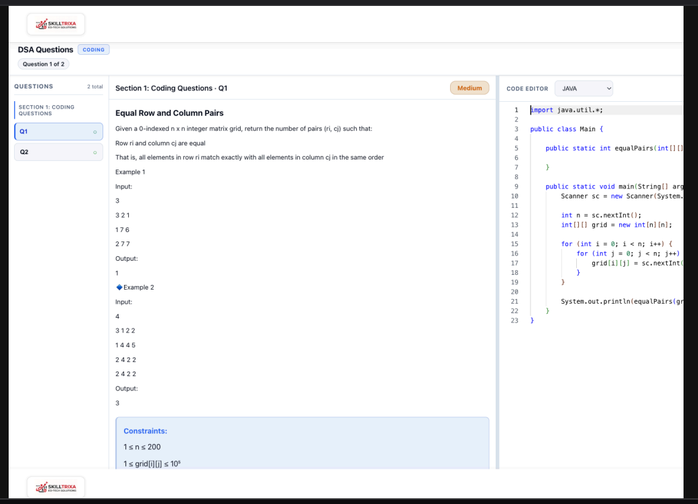

If any test uses AI, that cost is paid by the vendor

Live product · test.skilltrixa.com

Vendor admin · Dashboard

Student panel · Live coding exam

HOW THIS PROPOSAL IS ORGANISED

Four parts. Vendor admin and student panel are separate chapters.

Pages 07–28 are the college / training-partner workspace (red). Pages 29–41 are every student exam type (blue). Commercials sit after both product chapters.

PART 01

Overview

01 Cover
02 Contents
03 Vendor analytics
04 Vendor vs student on one tenant
05 All assessment types
06 Login and three roles

Context before any product screenshot chapter.

PART 02 · VENDOR ADMIN

College / partner workspace

07 Chapter divider
08 Dashboard
09 All assessments
10–14 Every test type (coding → projects)
15 Create / edit test
16–17 Question bank + coding item
18–20 Roster, classrooms, assign
21–22 Results + student analysis
23–25 Analytics (overview, tests, classrooms)
26 AI interviews
27–28 Practice, contests, settings, announcements

Pages 10–14: coding, aptitude, MCQ, English, theory, mixed, SQL, system, projects.

PART 03 · STUDENT PANEL

Enrolled student workspace

29 Chapter divider
30 Dashboard
31 Assigned coding tests
32 Aptitude exam + MCQ exam
33 Taking a mixed exam
34 Theory exam + SQL exam
35 Taking an English exam
36 Practice hub + problem list
37 Live AI interview
38 System design exam
39 Project exam
40 Taking a coding exam
41 Test result

Same live tenant. Student sees only assigned papers — never the question bank.

PART 04

Commercials

42 Vendor and student flow
43 ₹399 licence · AI paid by vendor
44 New vendor enrolment
45 Contact
46 Recap

VENDOR ANALYTICS

What the vendor sees on a running tenant.

Students
Enrolled on this vendor

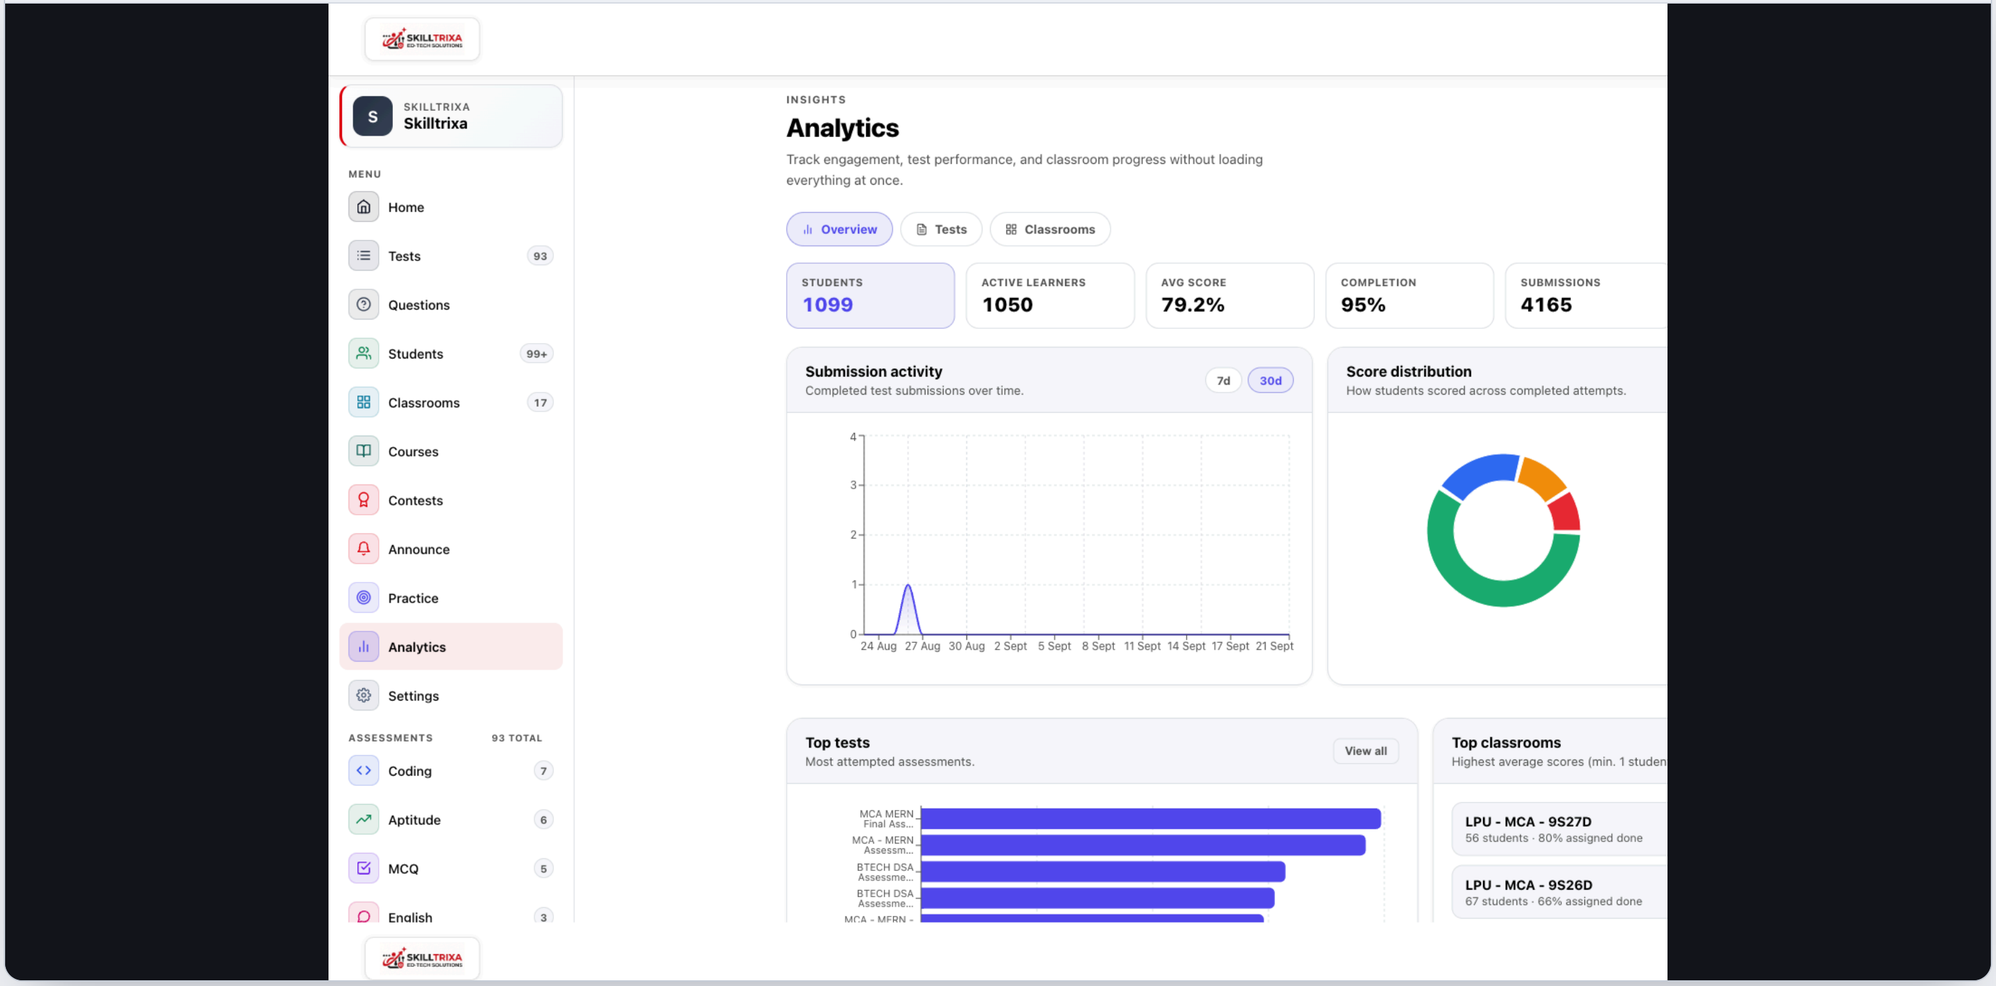

Tests
Coding, mixed, aptitude, English

Submissions
Auto-scored attempts

Scores
Average and completion

Rooms
Progress by classroom

VENDOR ADMIN · ANALYTICS OVERVIEW · SCORE BANDS, TOP TESTS, TOP CLASSROOMS

PLATFORM

Vendor admin and student panel on one tenant.

Without SkillTrixa

- Coding on a public judge, MCQs in Forms, attendance in Excel
- Batches managed in WhatsApp and shared sheets
- Results arrive late; answer keys leak in review mode
- No single view of who completed which assessment
- Mock interviews stay 1:1 and do not scale
- No fullscreen / tab-switch policy on the exam itself

On SkillTrixa

→ Vendor admin and student logins on the same tenant

→ Classrooms map to real sections; assign tests from the roster

→ Fullscreen exam, 5-violation cap, score-only or full review

→ Results, export, analytics and per-student analysis

→ Practice, contests and courses in the same student panel

→ AI interviews and project eval optional — billed only when used

ROLE

Super Admin

Creates vendors, allocates platform courses and tests, manages the global question bank and AI credits. Not shown in the rest of this deck.

PART 02 · THIS PROPOSAL

Vendor Admin

College or training partner. Question bank, every test type, classrooms, assign, results, analytics, branding. Pages 07–28.

PART 03 · THIS PROPOSAL

Student

Sees only assigned tests of every type, practice, interviews and results. Cannot see another vendor's content or the question bank. Pages 29–41.

MODULES

Every assessment type — vendor creates it, student takes it.

Coding
Java, C++, C, Python. Visible and hidden cases on sandboxed workers. Same editor for practice and exams.

INCLUDED IN ₹399

Aptitude
Quantitative, logical and analytical papers. Auto-marked on submit. Used alone or inside mixed placement tests.

INCLUDED IN ₹399

MCQ
Single and multiple-choice objective items. Instant scoring. Domain CS or custom vendor banks.

INCLUDED IN ₹399

English
Grammar, vocabulary, reading in the seat. Writing, speaking and listening use AI only when the vendor enables them.

CORE IN ₹399 · AI EXTRA

Theory
OS, DBMS, networks and conceptual answers. Auto-marked MCQ items or written-style theory papers.

INCLUDED IN ₹399

Mixed
Combine coding, MCQ, aptitude and theory in one timed assessment. Typical for weekly labs and campus drives.

INCLUDED IN ₹399

SQL / tools
Dataset templates. Student queries checked against expected output. Git / Linux-style tool tasks in the same list.

INCLUDED IN ₹399

System design
Architecture, capacity and trade-off prompts. Included in the seat — not an AI module.

INCLUDED IN ₹399

Interviews AI EXTRA
Voice interviews by topic and difficulty. Assign like a test. Transcript and AI score after the session.

BILLED ON USAGE

Projects AI EXTRA
GitHub and live URL submission, scored against a rubric. Company-specific templates are on the sidebar (coming soon).

BILLED ON USAGE

Vendor sidebar and student sidebar list the same types · company-specific templates coming soon

ACCESS

One login page. Role decides the workspace.

Super Admin

Creates vendors, allocates platform courses and tests, manages the global question bank and AI credits. Not shown in the rest of this deck.

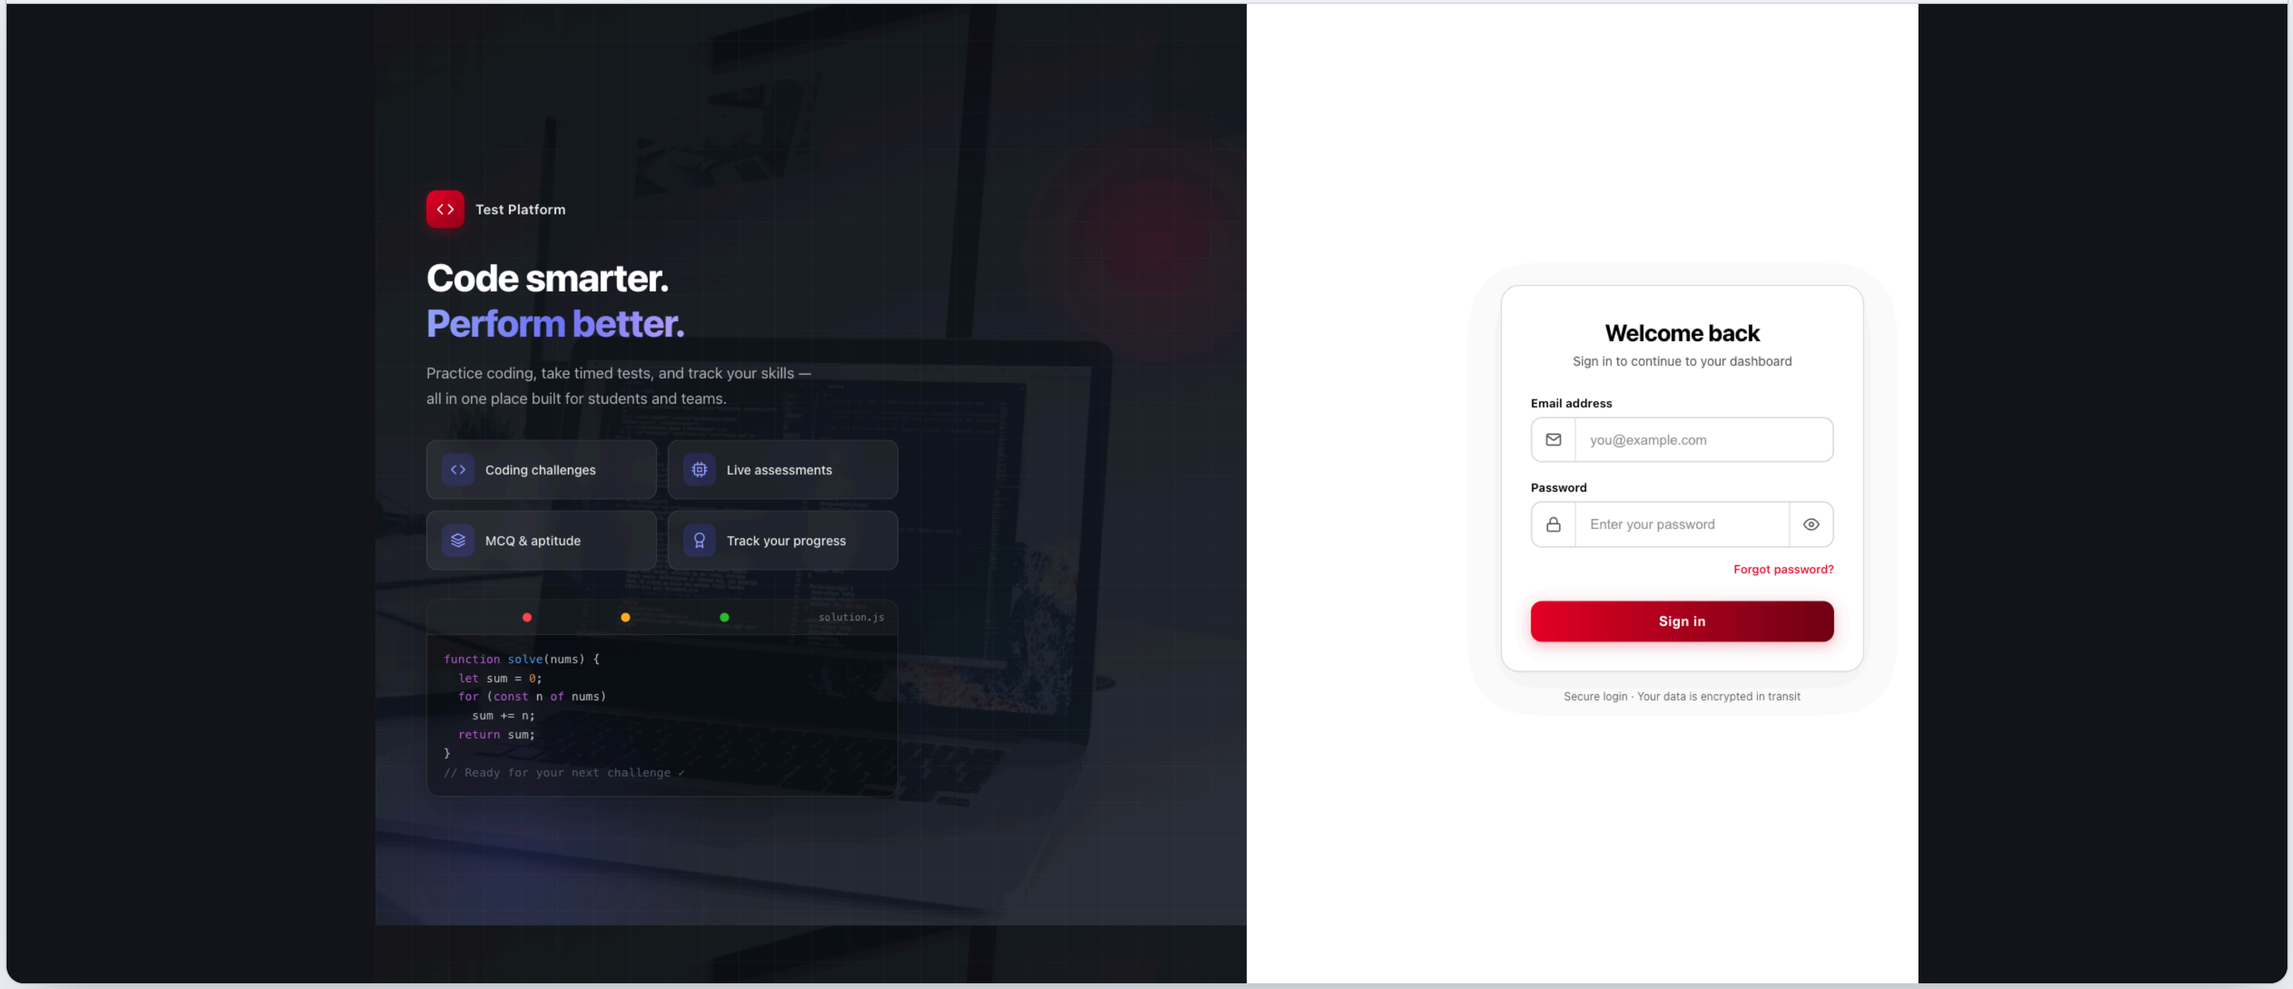

Vendor Admin · Part 02

College or training partner. After login: dashboard, every test type, question bank, students, classrooms, analytics, settings. Pages 07–28.

Student · Part 03

After login: assigned coding, aptitude, MCQ, mixed, English, theory, SQL, system, interviews, projects. Cannot open vendor screens. Pages 29–41.

SHARED LOGIN · HTTPS · JWT · ROLE-BASED REDIRECT TO VENDOR ADMIN OR STUDENT PANEL

PART 02 · PAGES 08–28

Vendor admin

The college / training-partner workspace. Create questions and every test type, enroll students, assign classrooms, and review results. Red bar on every following page.

01	02	03	04	05
Question bank	Create a test	Assign classroom	Students sit exam	Results + analytics

Who logs in here

College exam cell / training partner — not the student

Owns the question bank, roster, classrooms and result policy

Students never see these screens; they get assigned work only

Same tenant as the student panel after login

Screens in this chapter

08	Dashboard	09	All assessments
10	Coding tests	11	Aptitude + MCQ
12	English + Theory	13	Mixed + SQL
14	System + Projects	15	Create / edit test
16	Question bank	17	Create coding question
18	Student roster	19	Classrooms
20	Assign a test	21	Test results
22	Student analysis	23–25	Analytics
26	AI interviews	27–28	Practice, contests, settings, announcements

VENDOR ADMIN Home after login · counts and shortcuts for every assessment type

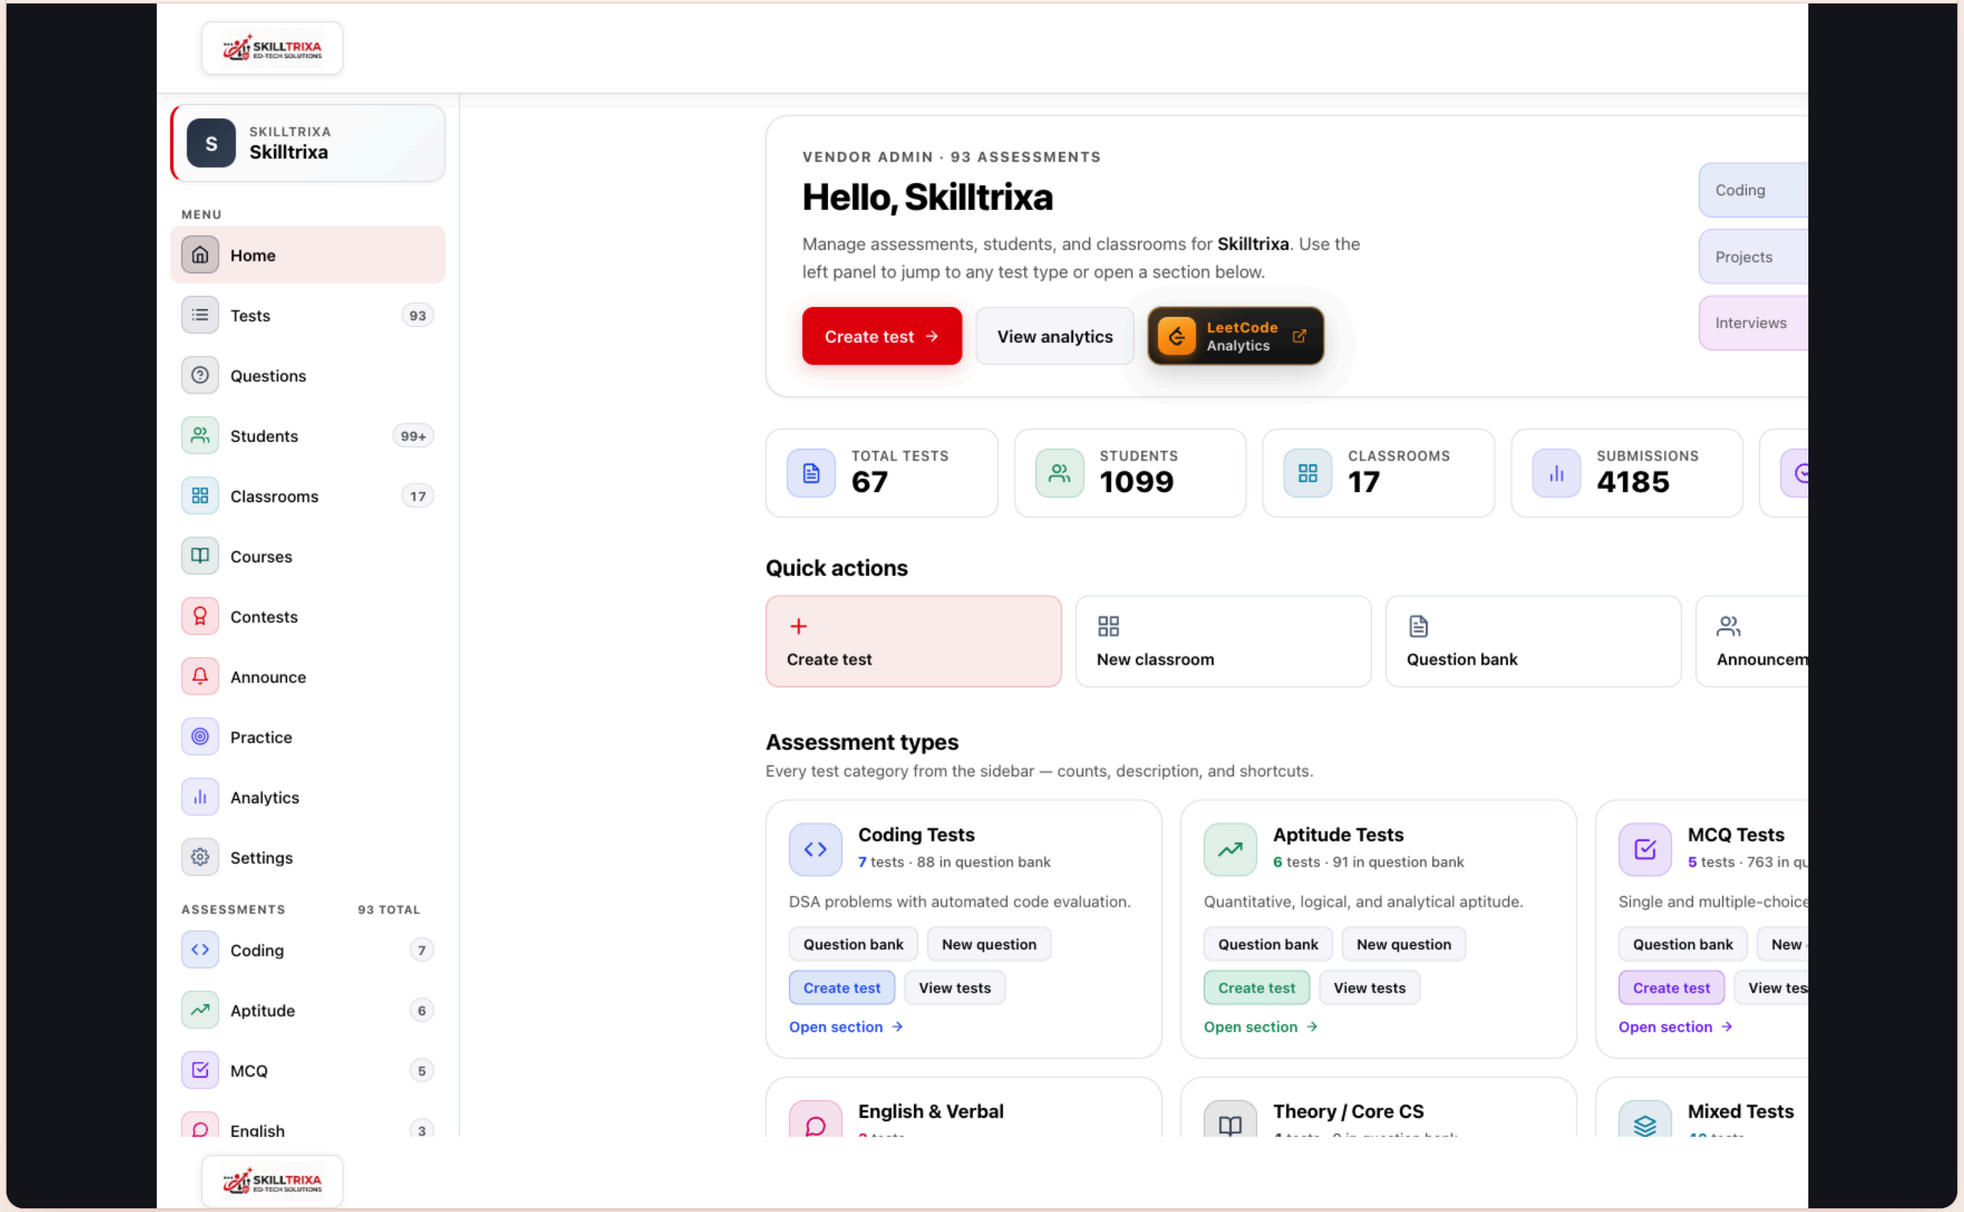

Dashboard

First screen after login. Totals, then jump to create test, analytics or a test type.

- Live totals: tests, students, classrooms, submissions
- Create test, view analytics, practice analytics
- Sidebar: Coding, Aptitude, MCQ, English, Theory, Mixed, Projects, Interview, System, SQL
- Quick actions: new classroom, question bank, announcements

Student dashboard is a different screen — Part 03, page 30.

VENDOR ADMIN · DASHBOARD

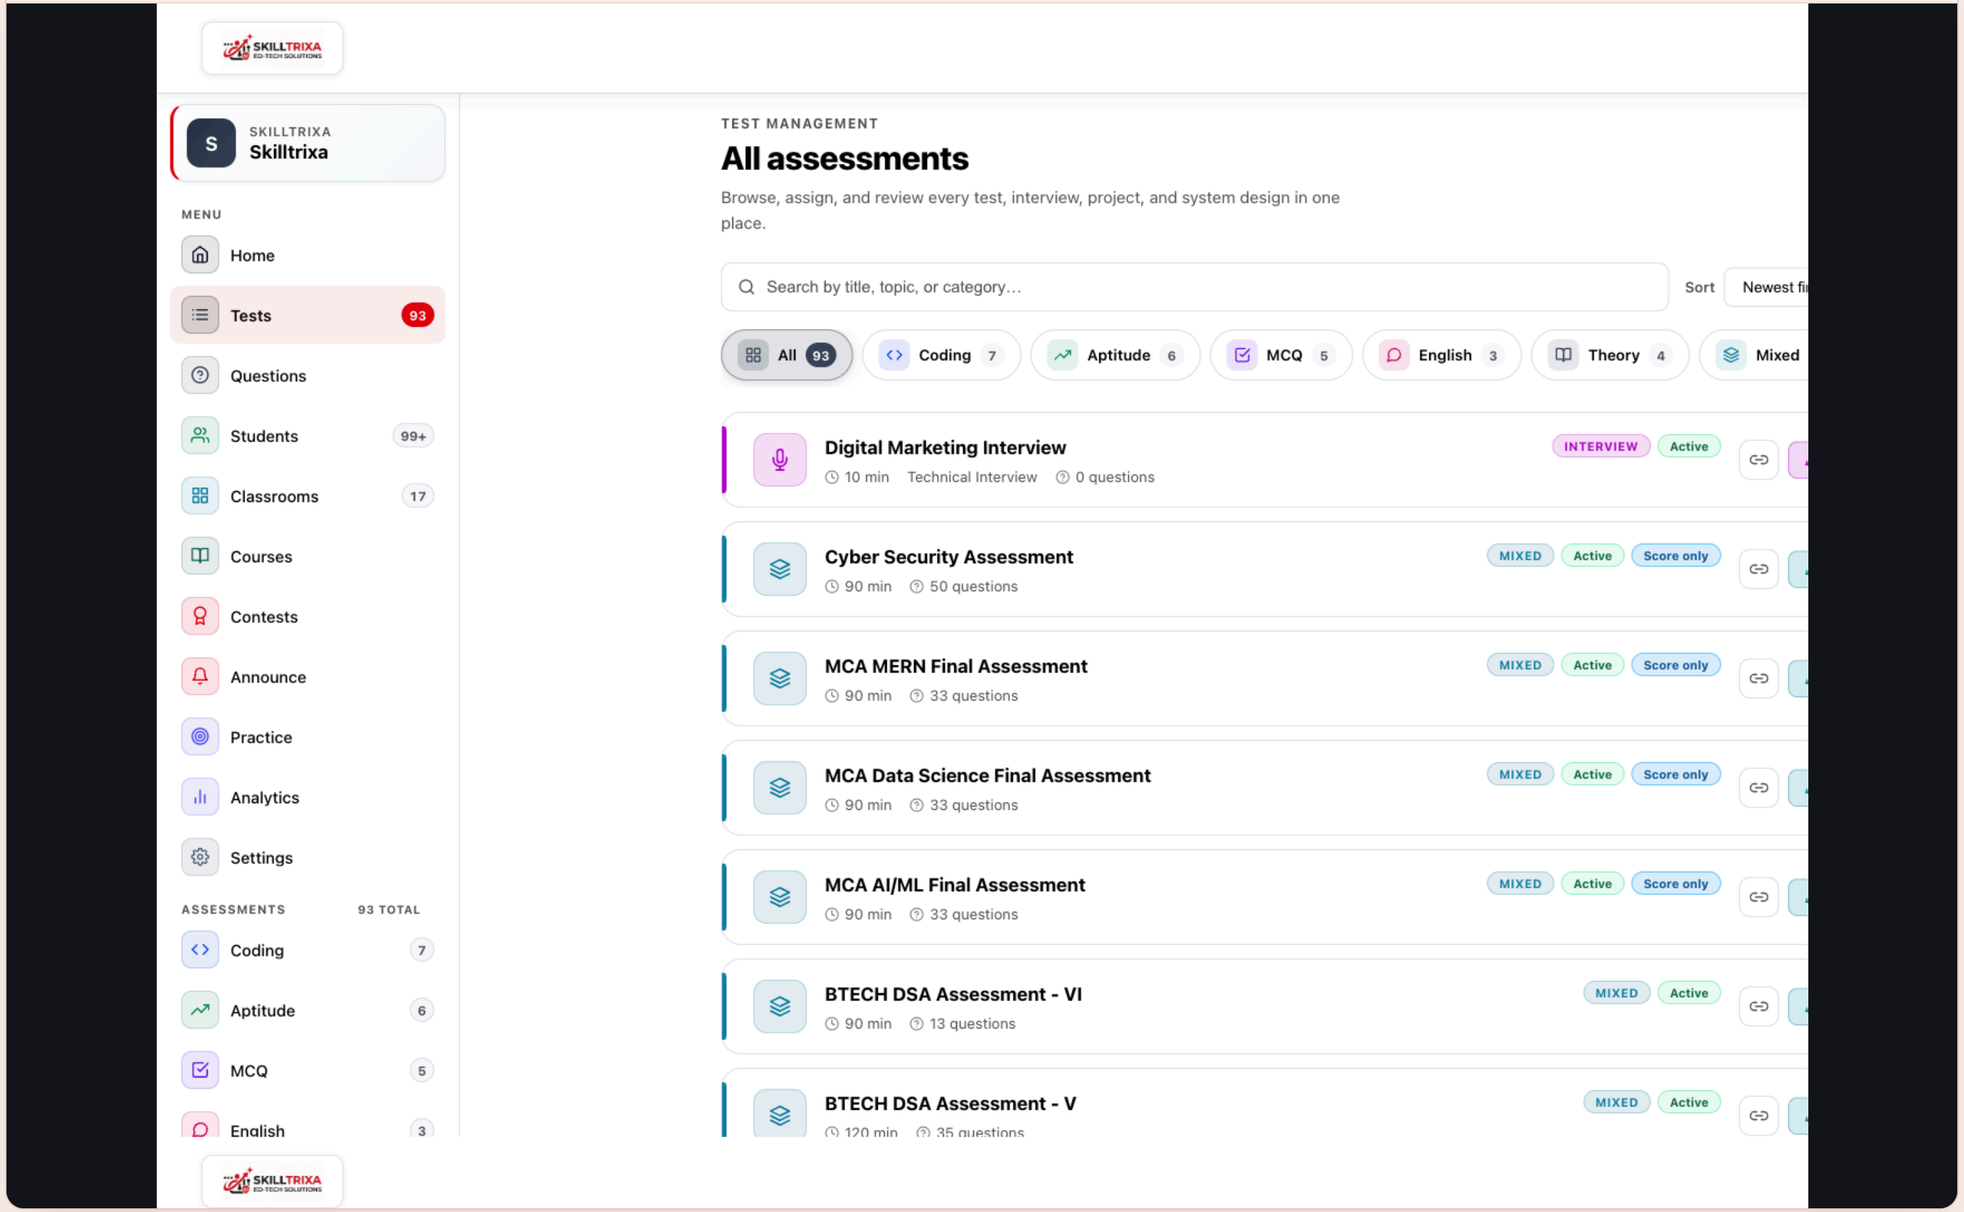

VENDOR ADMIN Tests · one list for every paper on the account

All assessments

Filter by type, then copy the link, assign a classroom, or open results. Students never see this list — only papers assigned to them.

- One list for coding, aptitude, MCQ, English, theory, mixed, projects, interviews, system and SQL
- Each row: copy link, assign, results
- Status (active), duration, question count, score-only flag
- New test from the top-right action

VENDOR ADMIN · ALL ASSESSMENTS

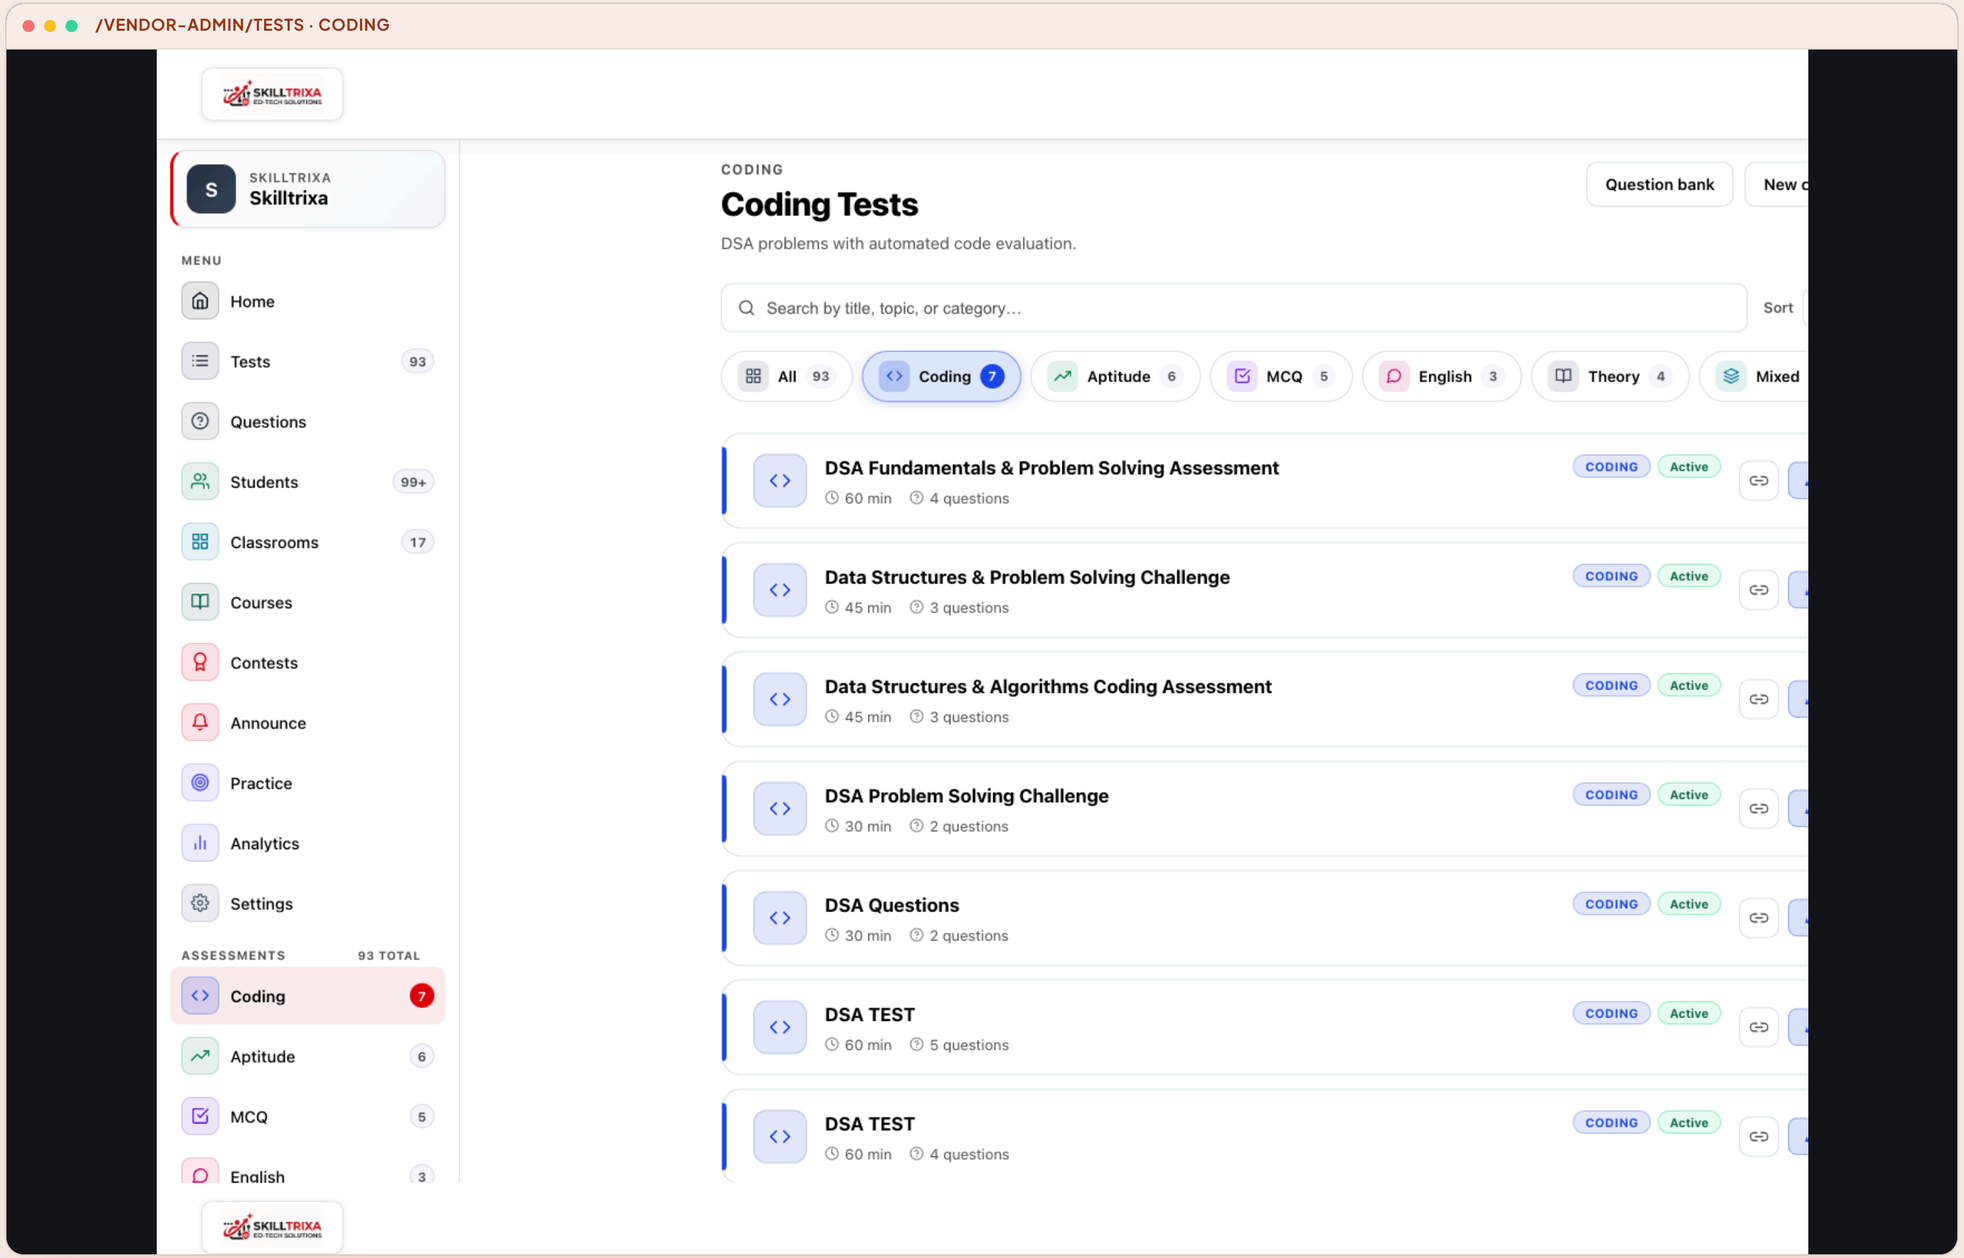

VENDOR ADMIN Tests · coding filter

Coding tests

Coding-only assessments. Student code is judged against visible and hidden test cases on sandboxed workers.

- Languages: Java, C++, C, Python
- Duration, exam window, assign, results
- Hidden cases run on sandboxed workers — not the API process
- Same list pattern as mixed / aptitude / English

VENDOR ADMIN Tests · aptitude filter and MCQ filter

Showing all 4 items

VENDOR ADMIN Create / edit a paper from the question bank

Create / edit test

Build a paper in one sitting — duration, window, result policy and questions from the bank.

- Title, duration, schedule (start / end window)
- Result policy: full review or score only
- Add questions from the bank; total marks update live
- Auto-submit in-progress attempts when the window ends

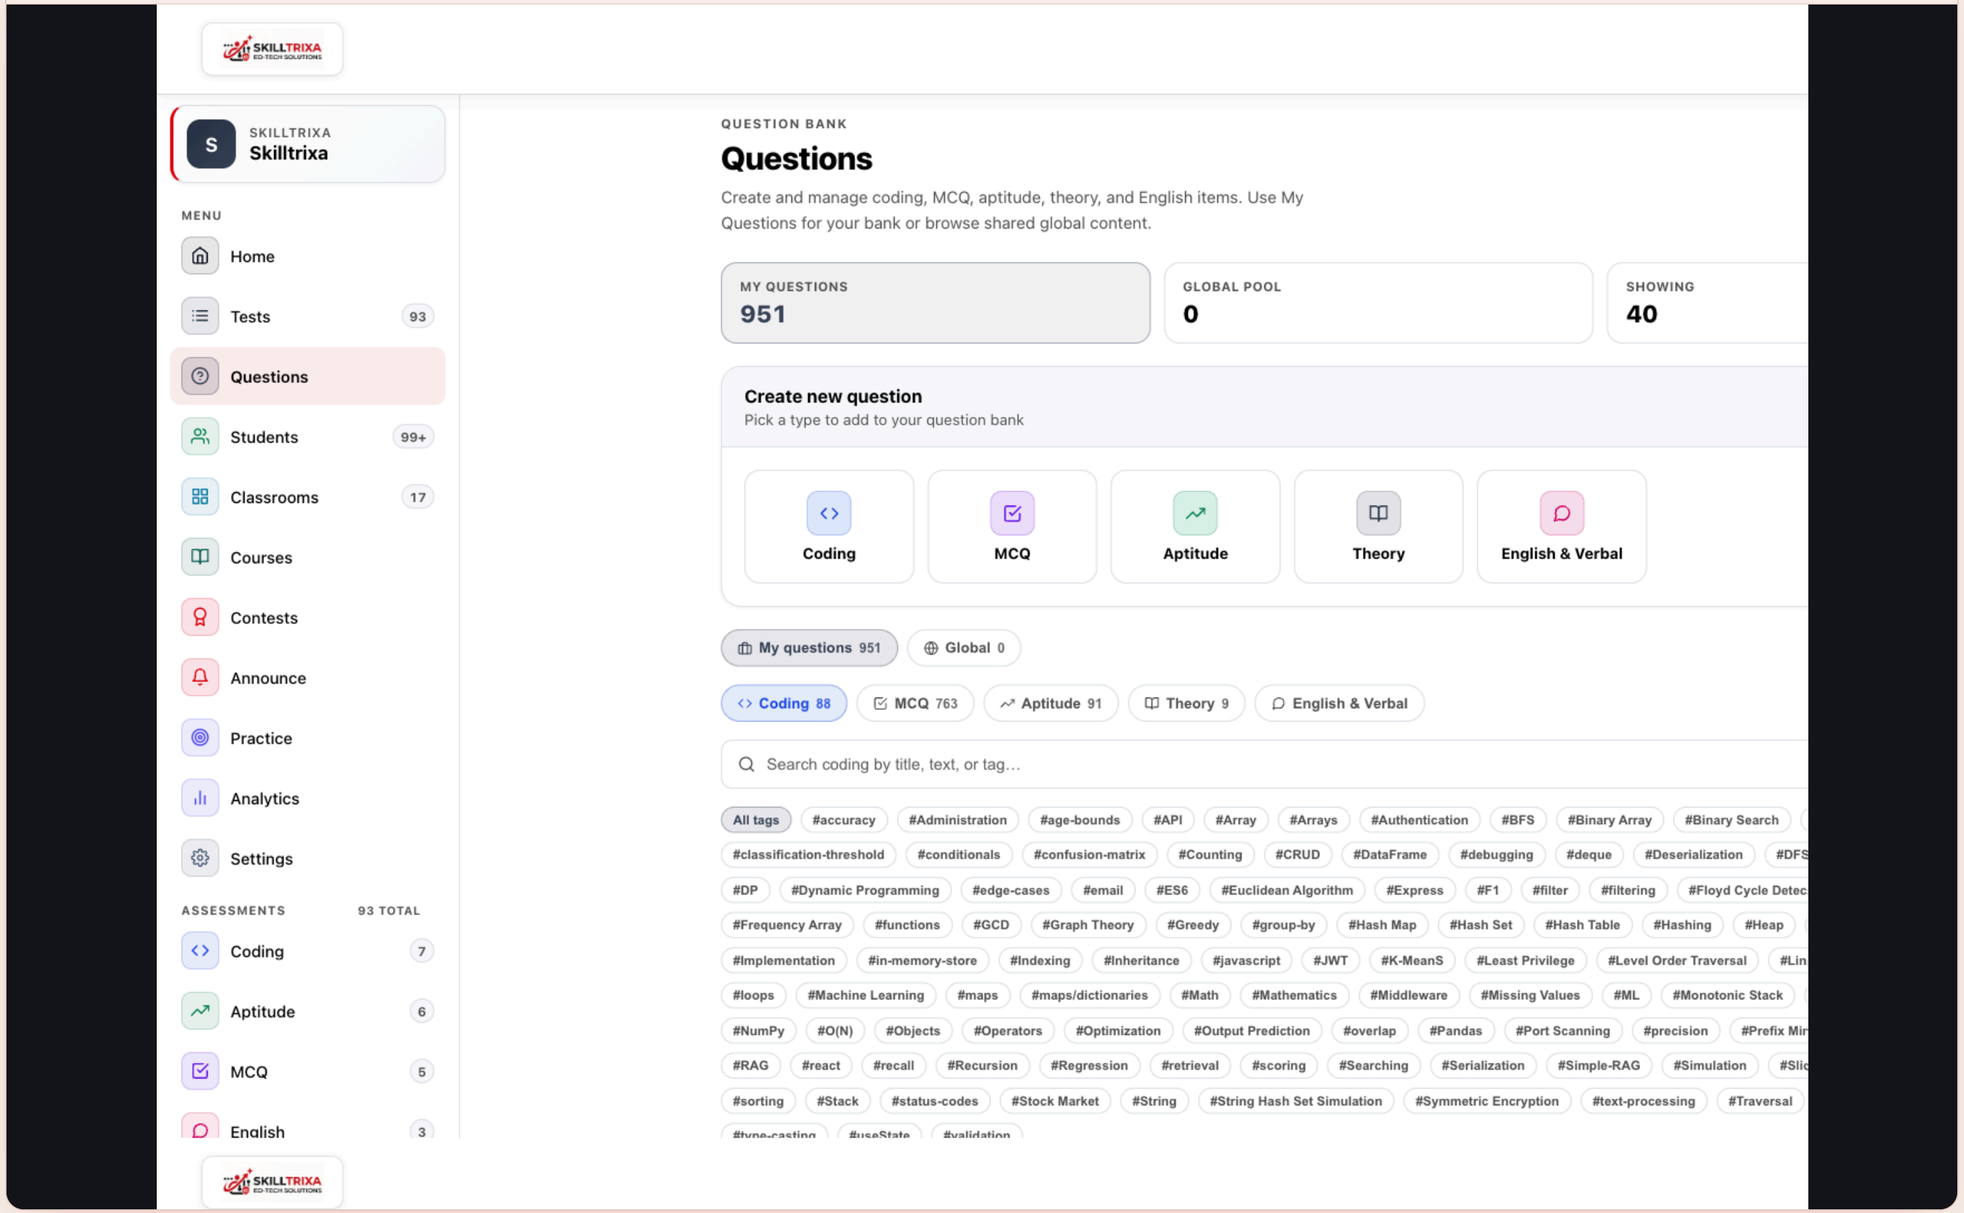

VENDOR ADMIN Question bank · vendor-owned, reused across later tests

Question bank

Items live here, not inside a single paper. Students never open this screen.

- Vendor-owned question bank, reused across later tests
- Coding, MCQ, aptitude, theory and English item types
- Filter by type and tags
- Create coding, MCQ, aptitude, theory or English items

/VENDOR-ADMIN/QUESTIONS

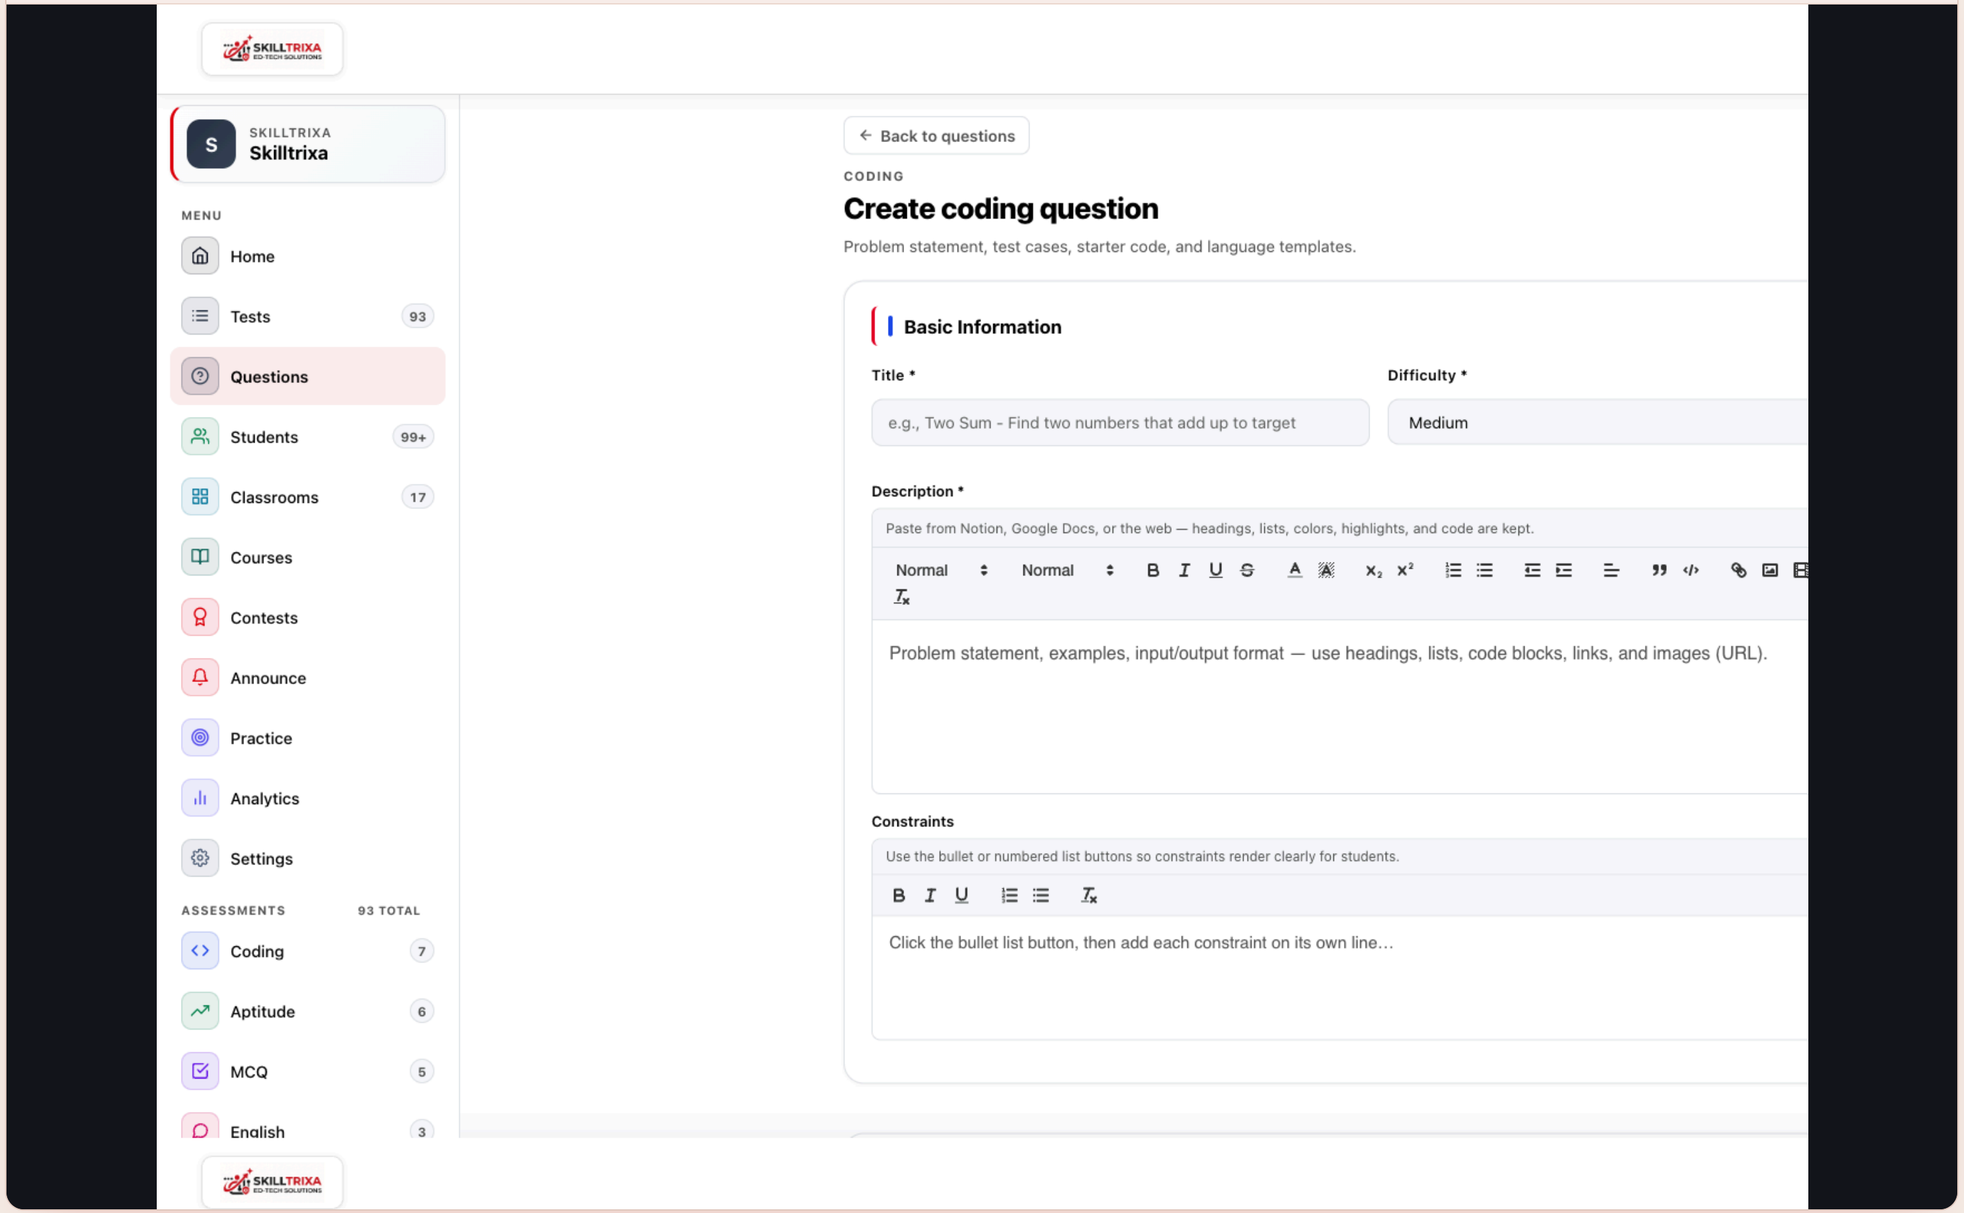

VENDOR ADMIN Author a coding item the judge will use in the exam

Create coding question

The student editor and judge use this same data during the exam — statement, starter code, visible and hidden cases.

- Problem statement and constraints
- Starter code per language (Java, C++, C, Python)
- Visible sample cases and hidden cases
- Difficulty, tags, marks

/VENDOR-ADMIN/QUESTIONS/CODING/CREATE

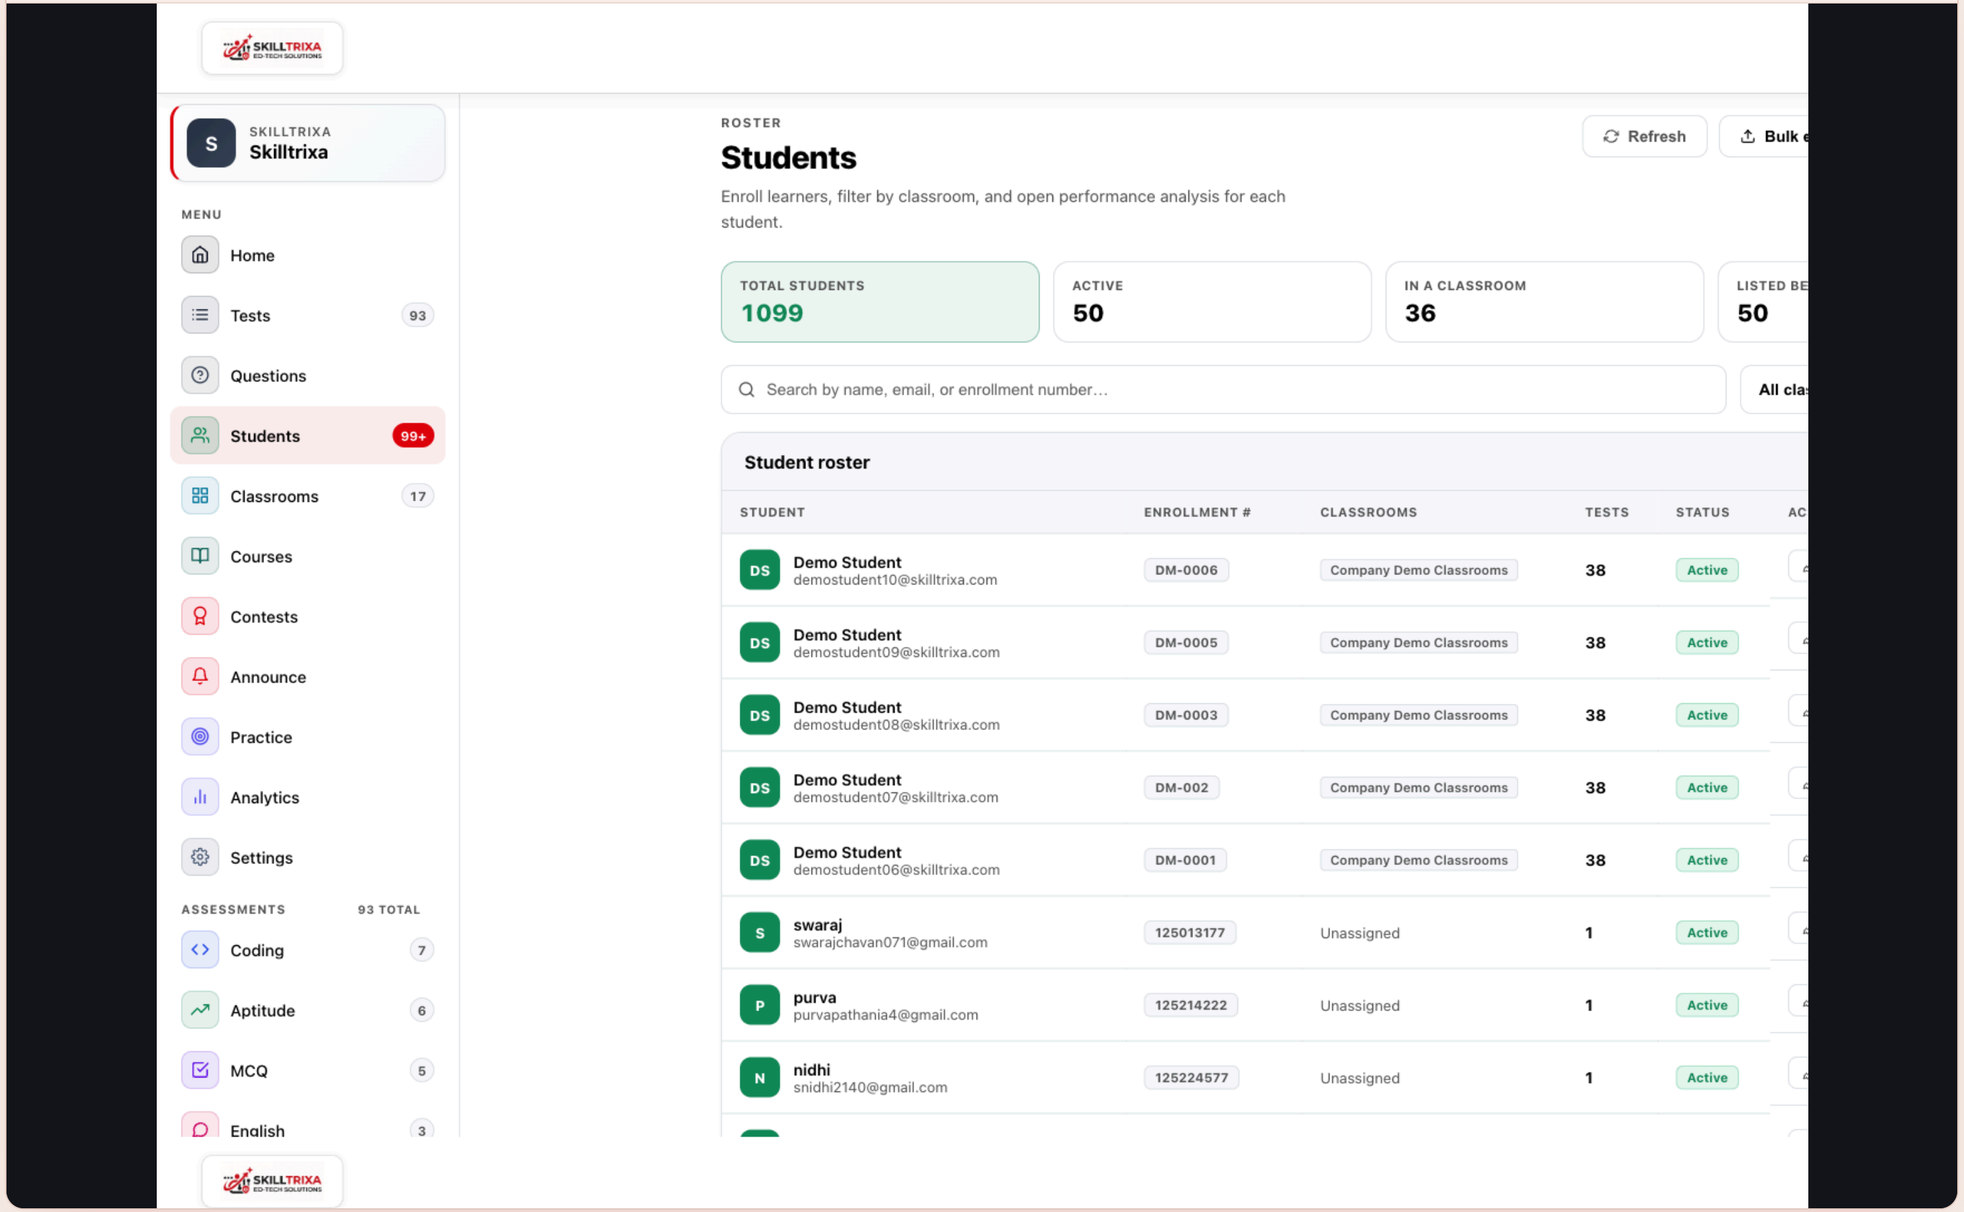

VENDOR ADMIN Roster · enroll, filter, open analysis

Student roster

The vendor's enrolled learners. Filter by classroom, bulk enroll, or open a per-student analysis file.

- Enrolled learners for this vendor only
- Search by name, email or enrollment number
- Bulk enroll and add student
- Edit or open Analysis on every row

/VENDOR-ADMIN/STUDENTS

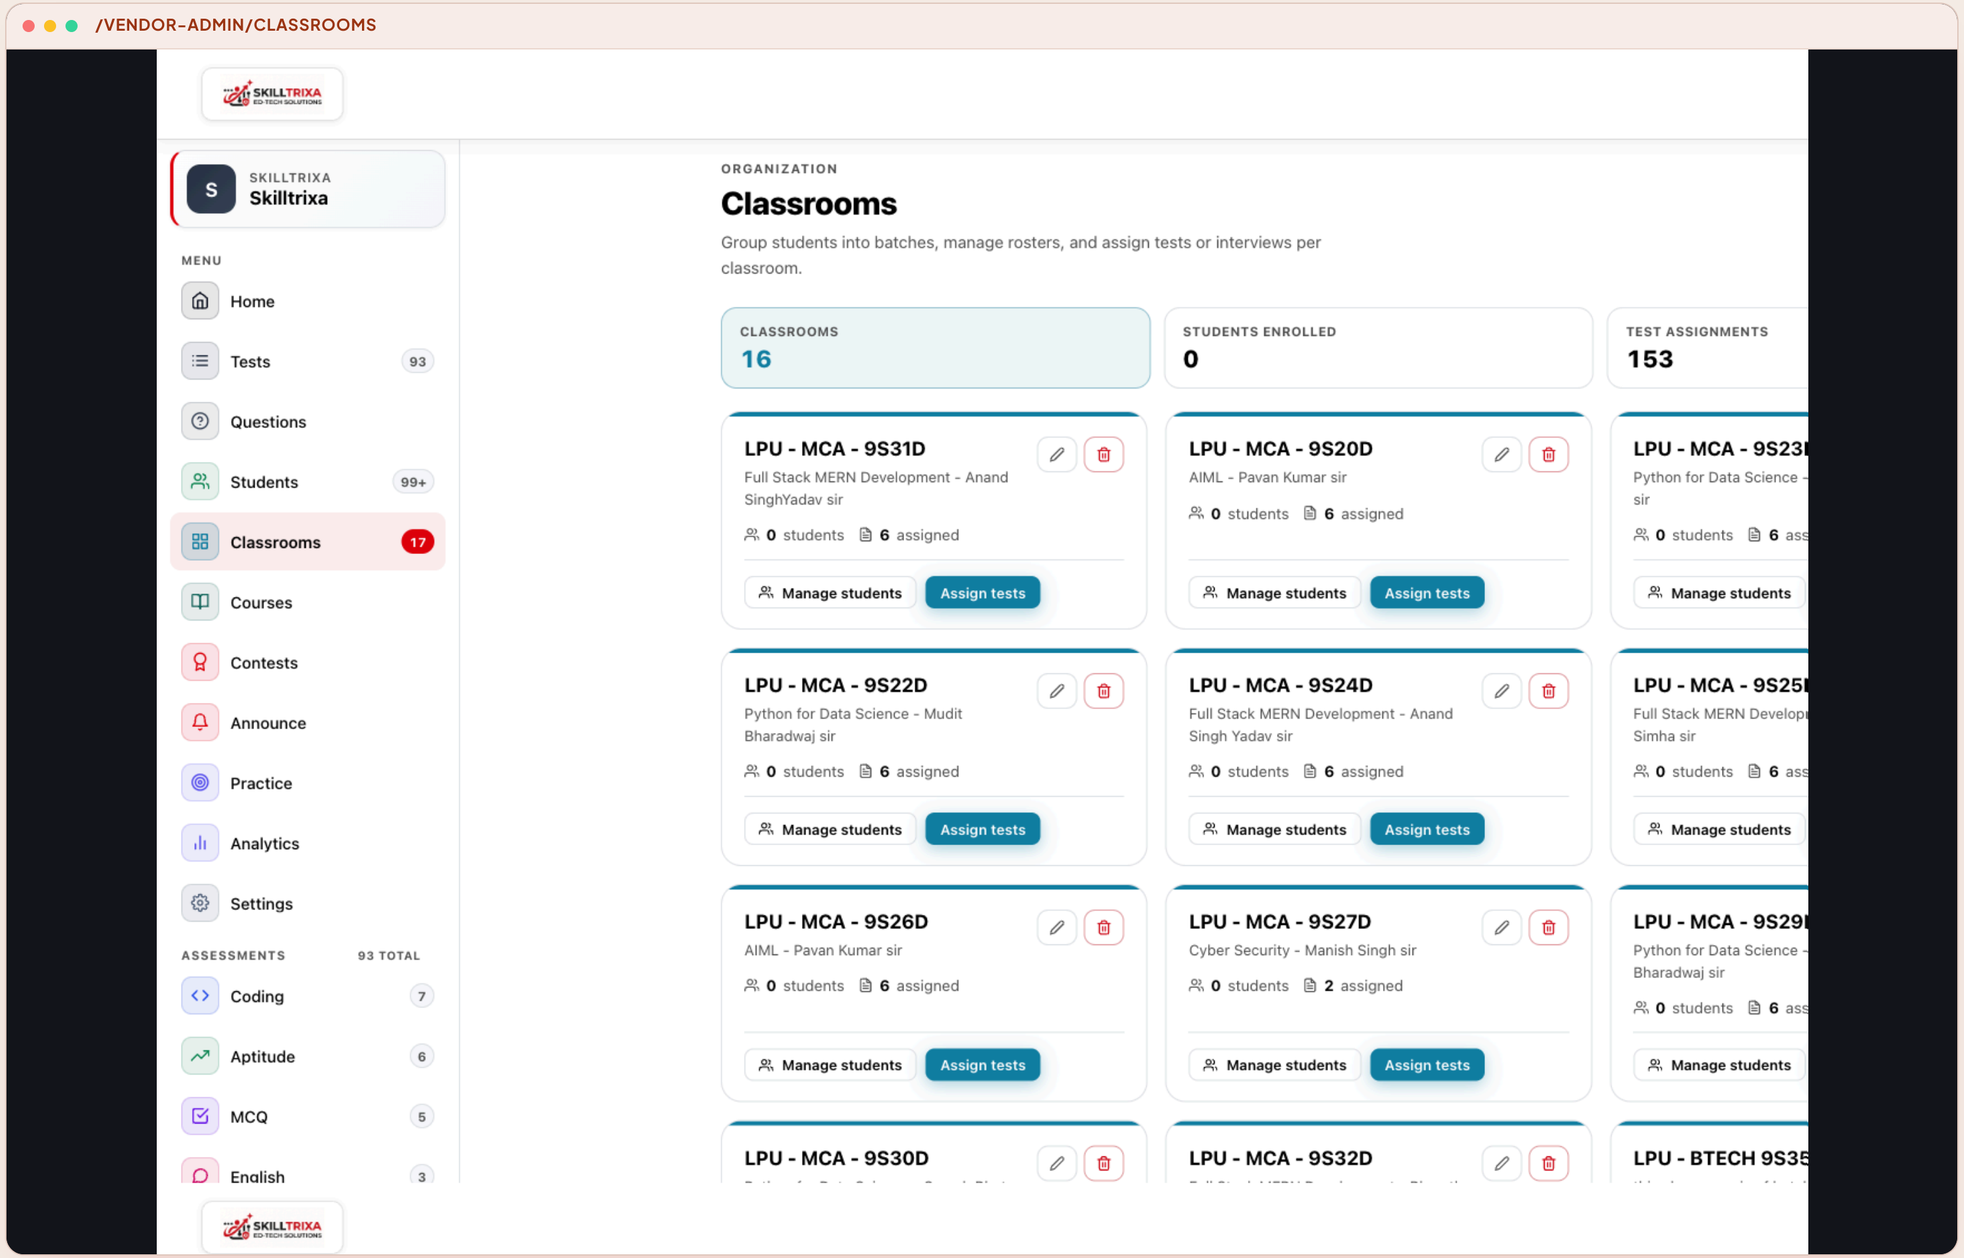

Filter by classroom

VENDOR ADMIN Map real college sections, then assign a test to the whole room

Classrooms

Map real college sections. Each card holds faculty, roster and assigned tests.

- One classroom per real section (department × batch)
- Faculty, roster and assigned tests on each card
- Manage students per classroom
- Used as the target when assigning tests

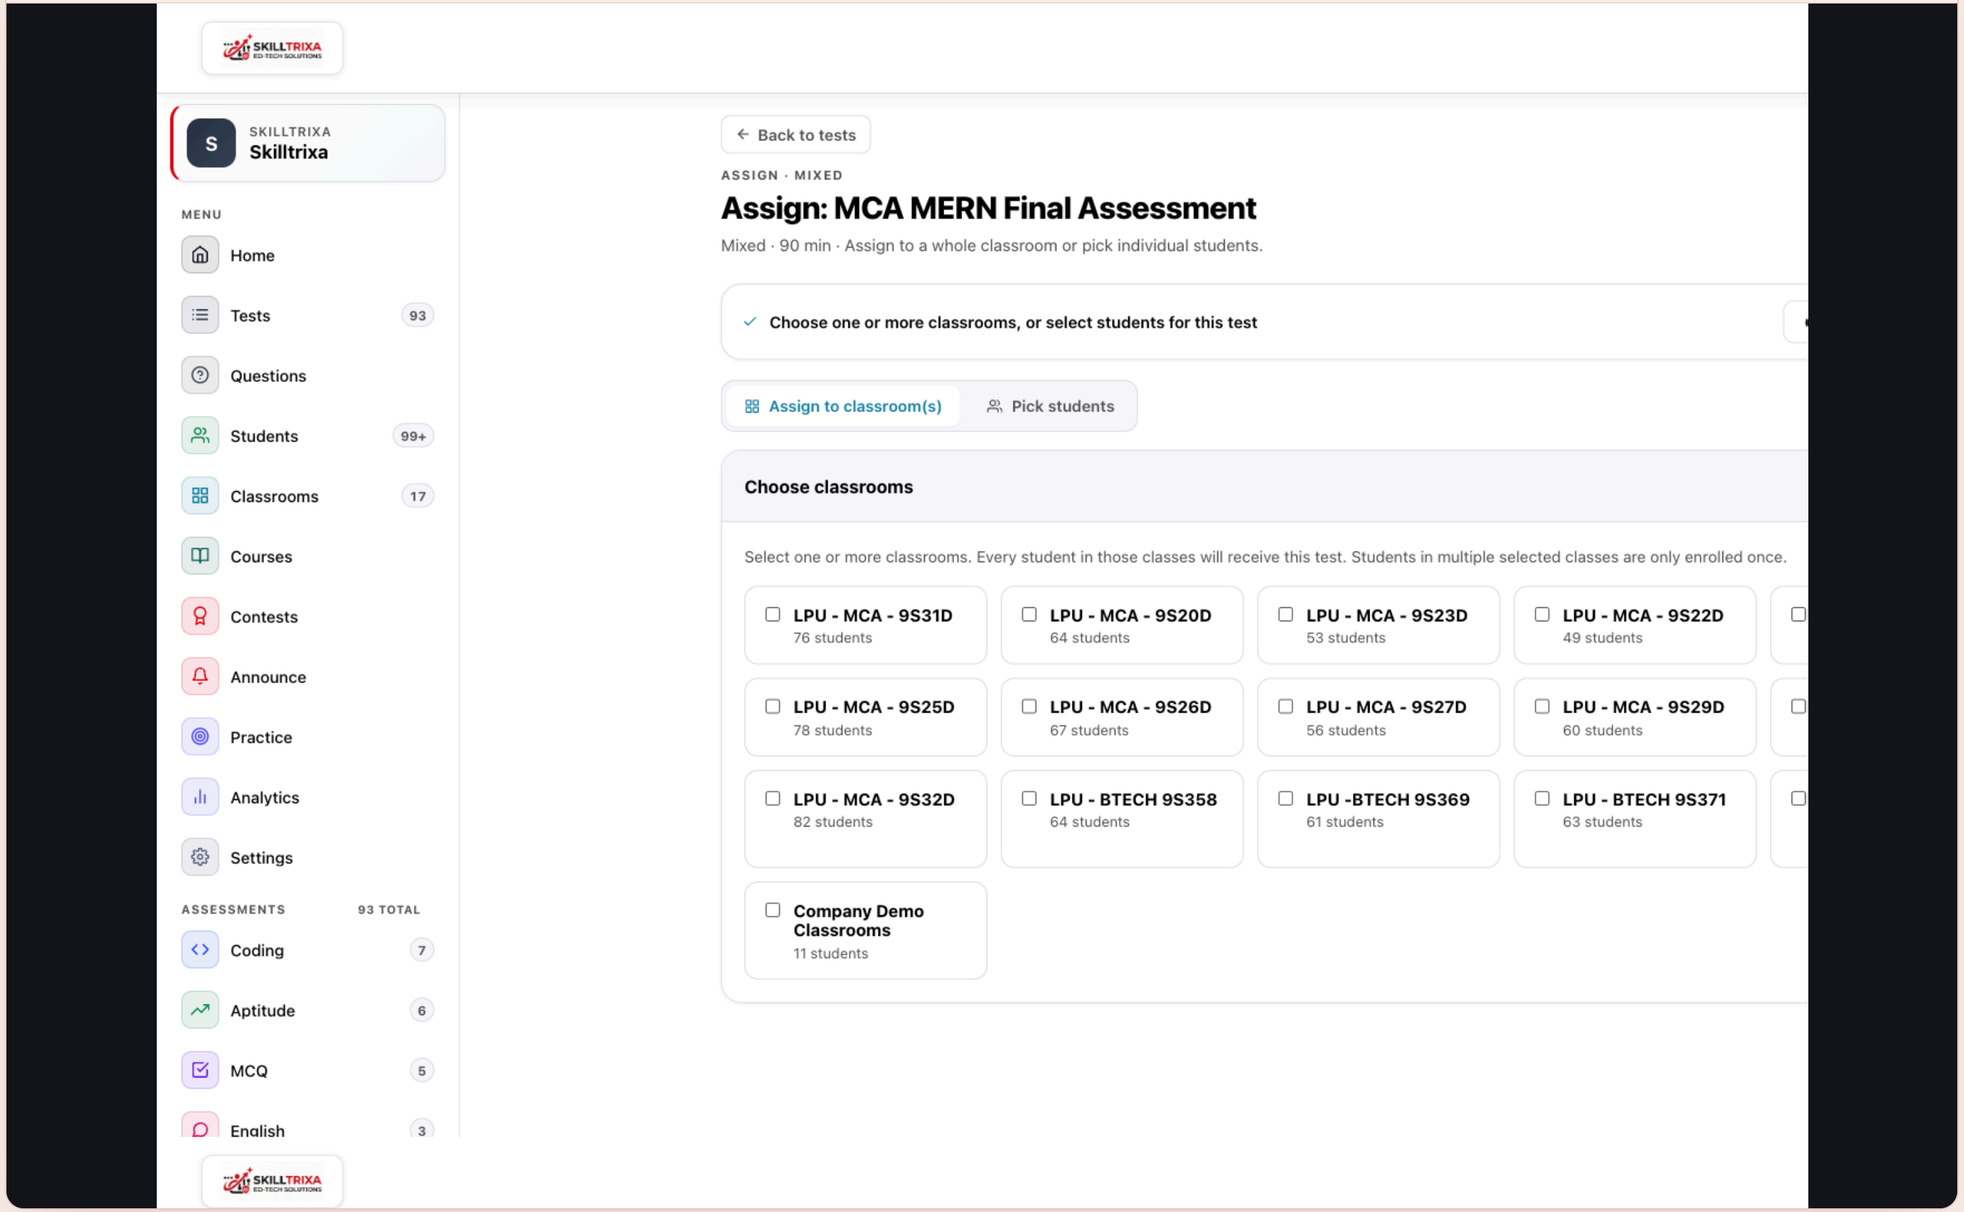

VENDOR ADMIN Push a paper to classrooms and/or named students

Assign a test

Send an assessment to classrooms and/or named students. Assigned students then see the paper on their dashboard — they do not pick it from a public list.

- Select one or more classrooms
- Optionally add individual students
- Same flow for coding, mixed, interviews, contests
- Assigned students see the test on their dashboard

ASSIGN A TEST · CLASSROOMS AND NAMED STUDENTS

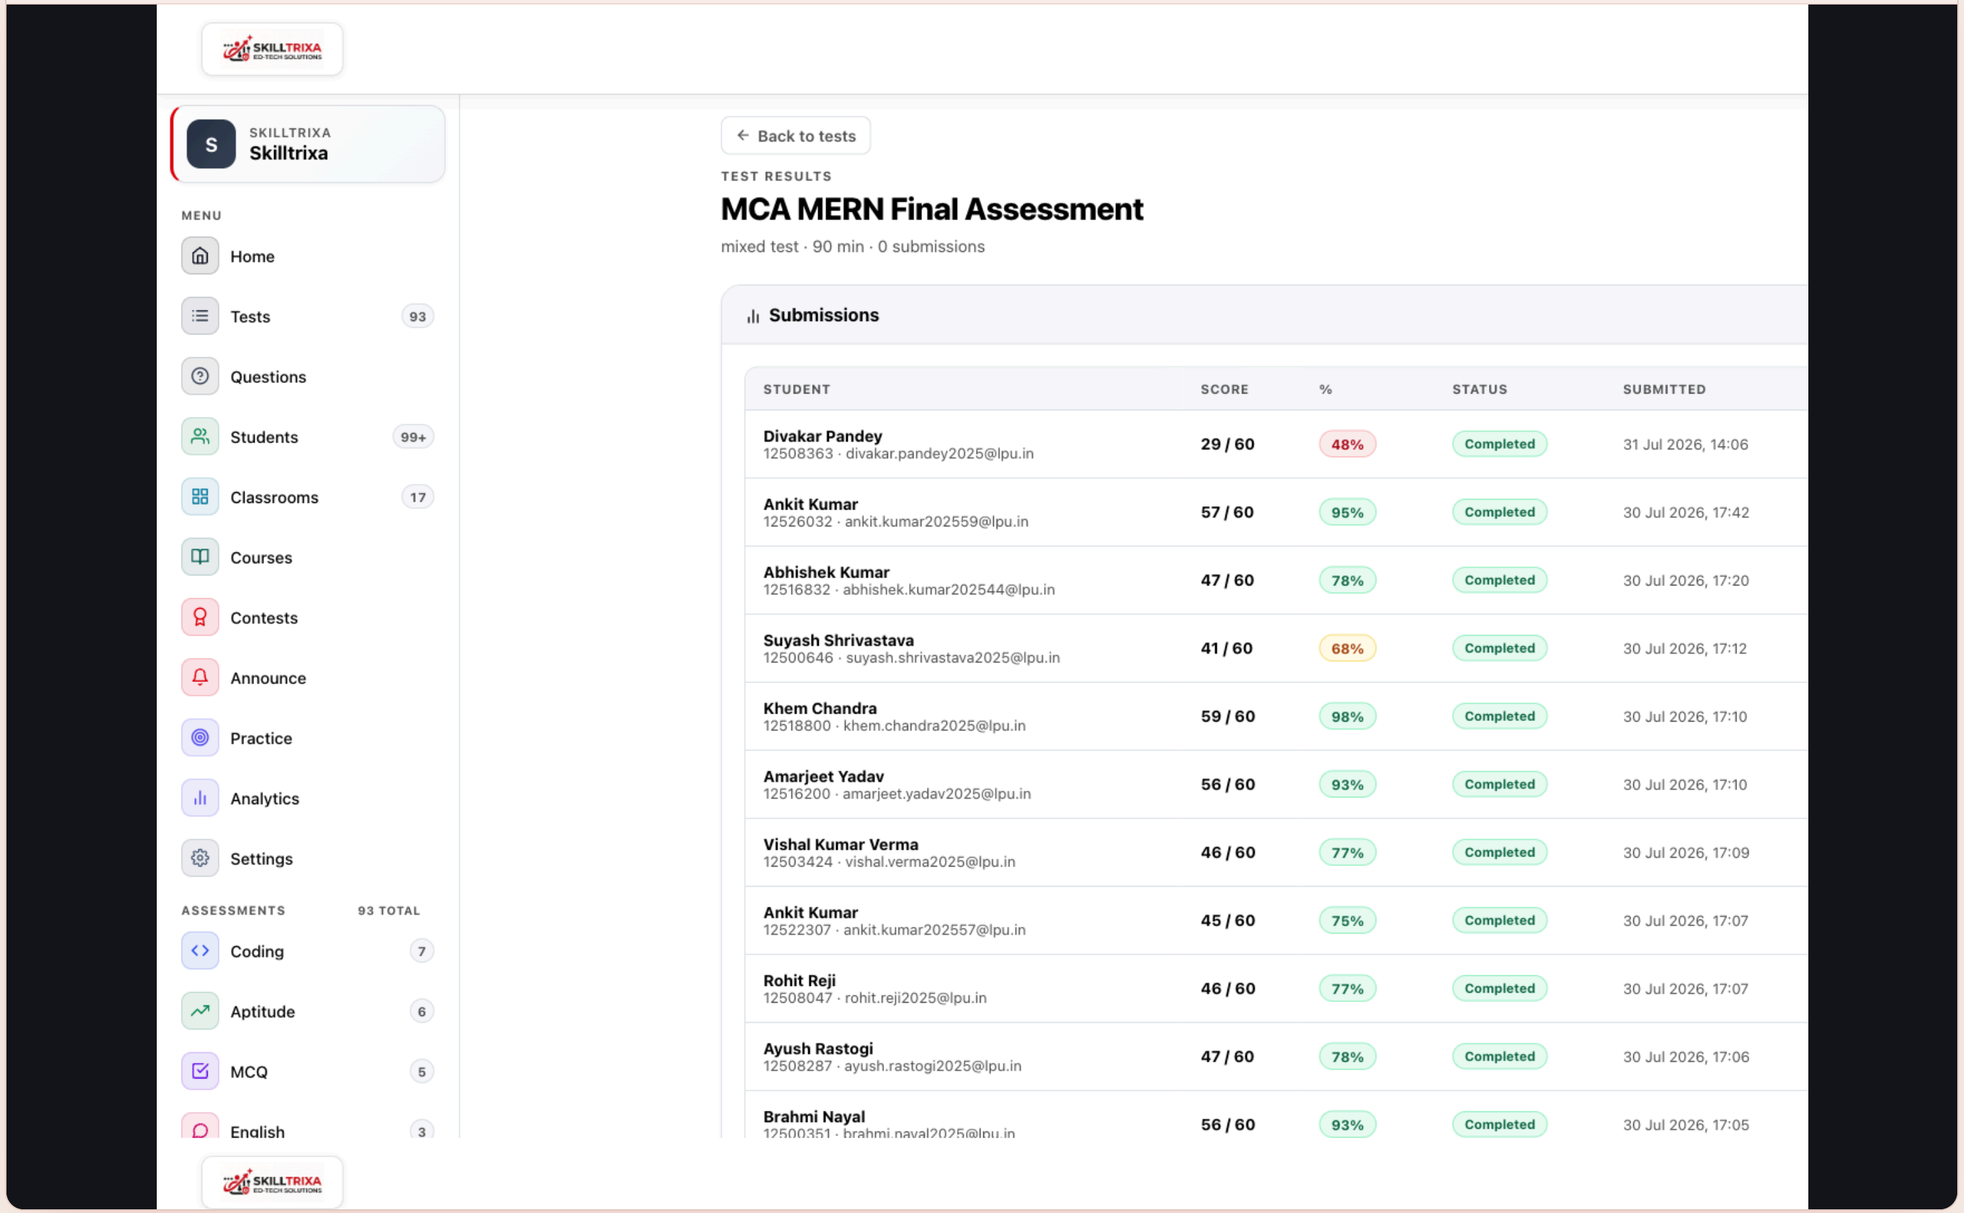

VENDOR ADMIN Live submissions · used to shortlist after a mixed or coding test

Test results

Live submissions for a paper. Export or open details per attempt. Used to shortlist after a mixed or coding test.

- Columns: student, score, %, status, submitted time
- View details per attempt · Export report
- Sort and scan completed vs in-progress rows
- Used to shortlist after a mixed or coding test

TEST RESULTS · SUBMISSIONS TABLE

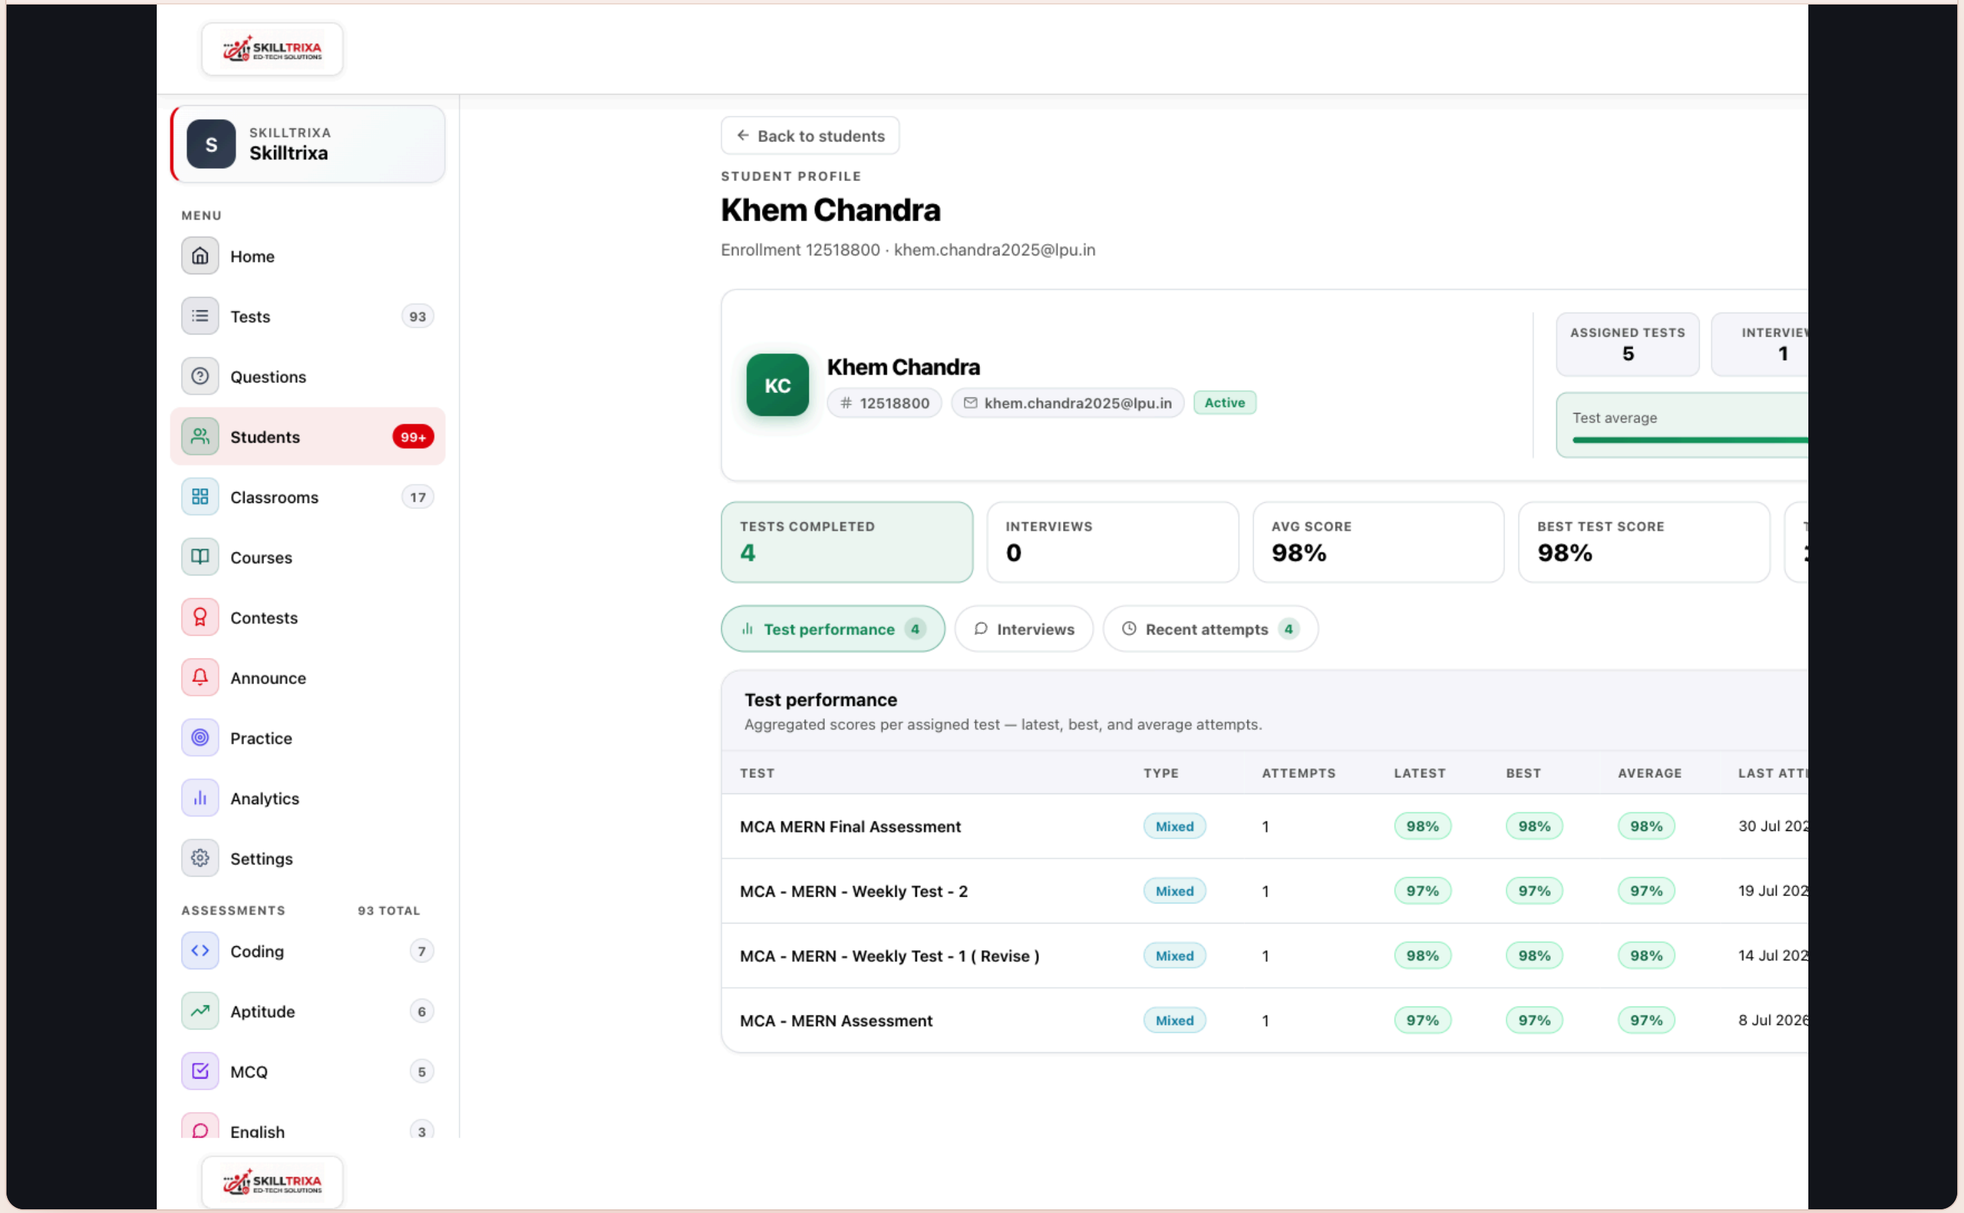

VENDOR ADMIN Per-student file for mentoring — opened from the roster

Student analysis

One profile per learner: assigned vs completed, scores, attempt history, interviews.

- Tests assigned vs completed
- Average score, best score, total points
- Attempt history with type and last attempt date
- Interviews and recent attempts on separate tabs

STUDENT ANALYSIS · OPENED FROM THE ROSTER

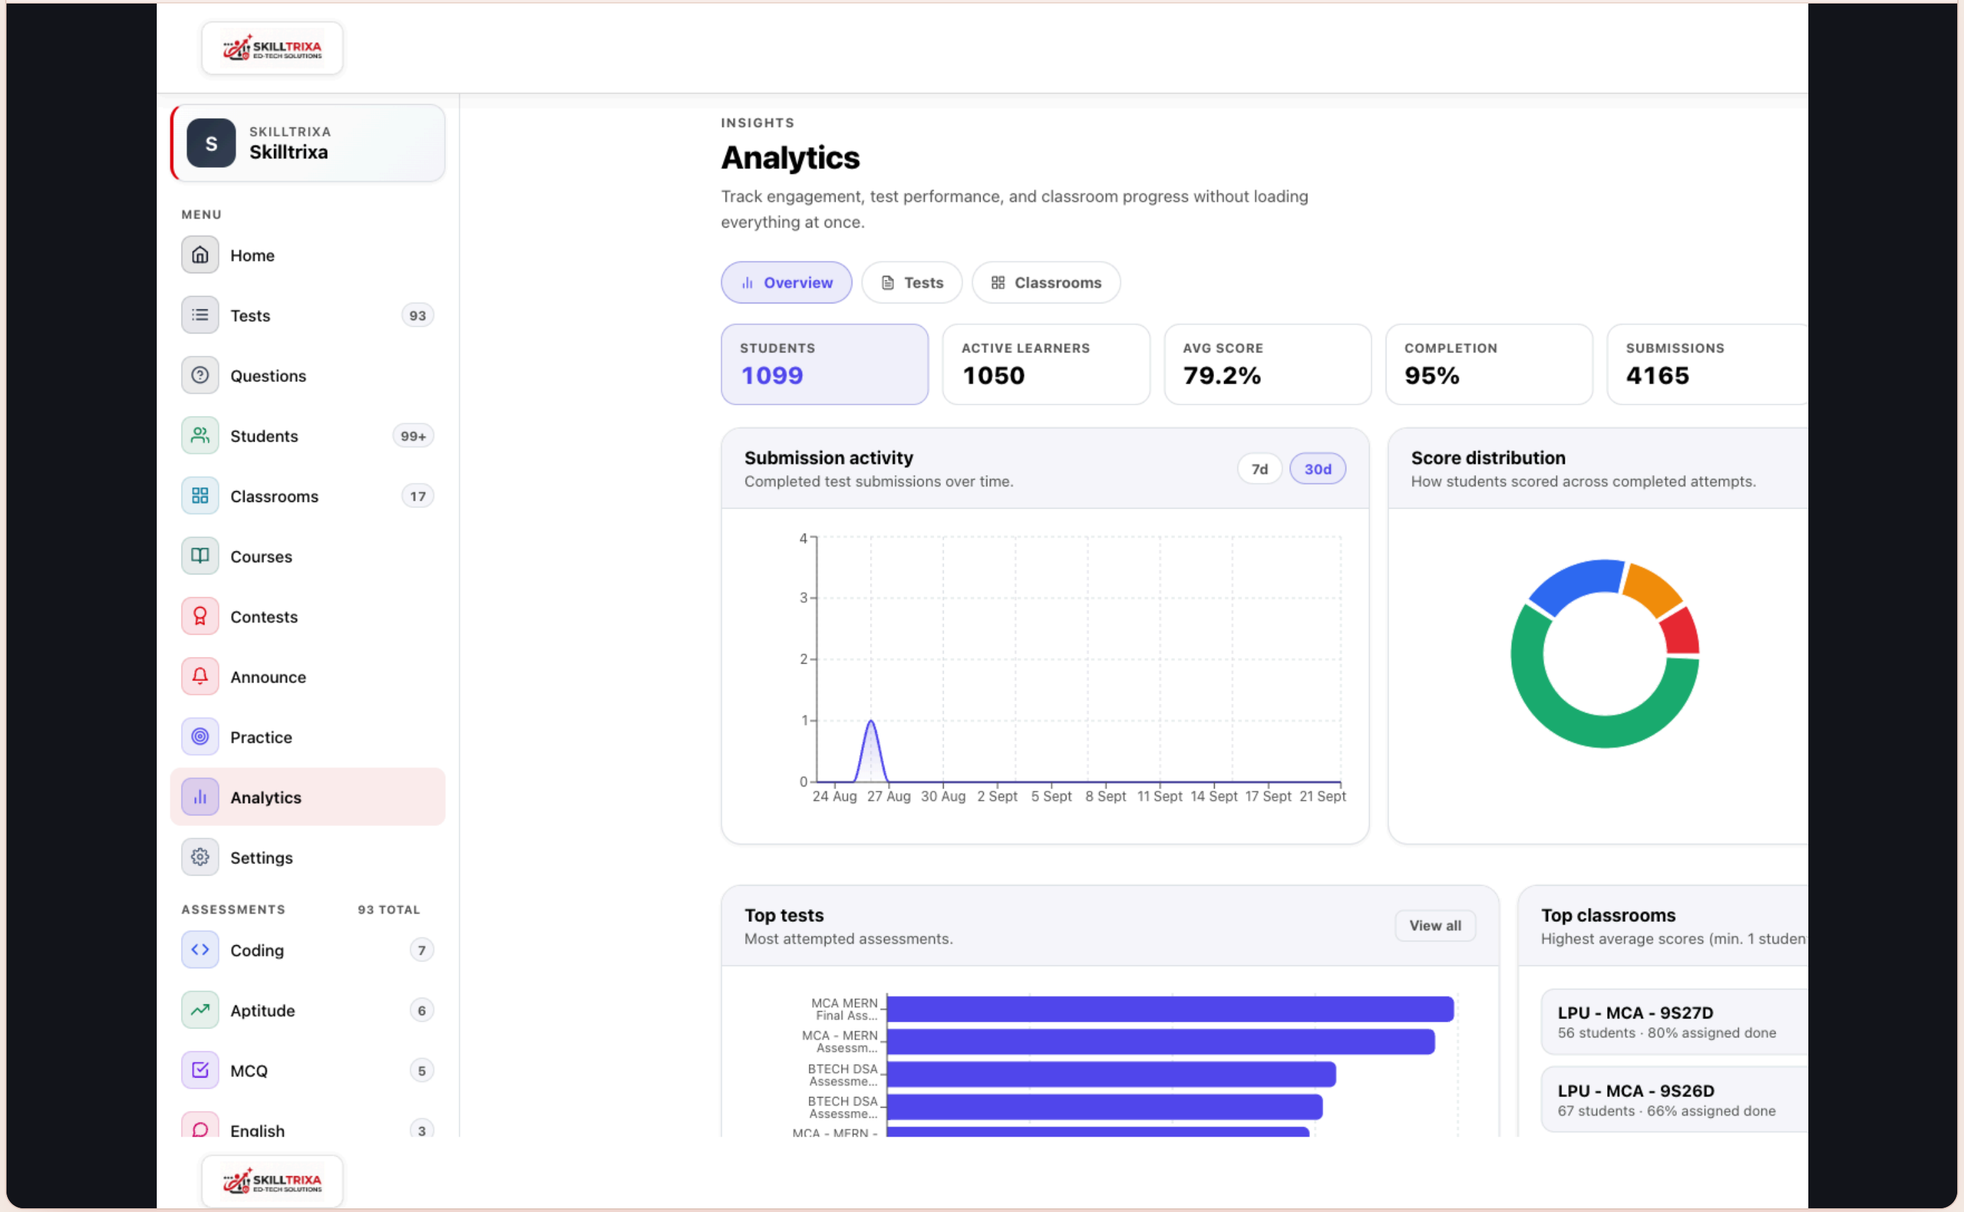

VENDOR ADMIN Analytics · Overview tab

Analytics overview

Account-level signal: students, scores, completion, tests and classrooms. Tabs: Overview, Tests, Classrooms.

- Students, active count, average score, completion
- Submissions and tests for the whole account
- Score bands across attempts
- Top classrooms by average score

/VENDOR-ADMIN/ANALYTICS · OVERVIEW

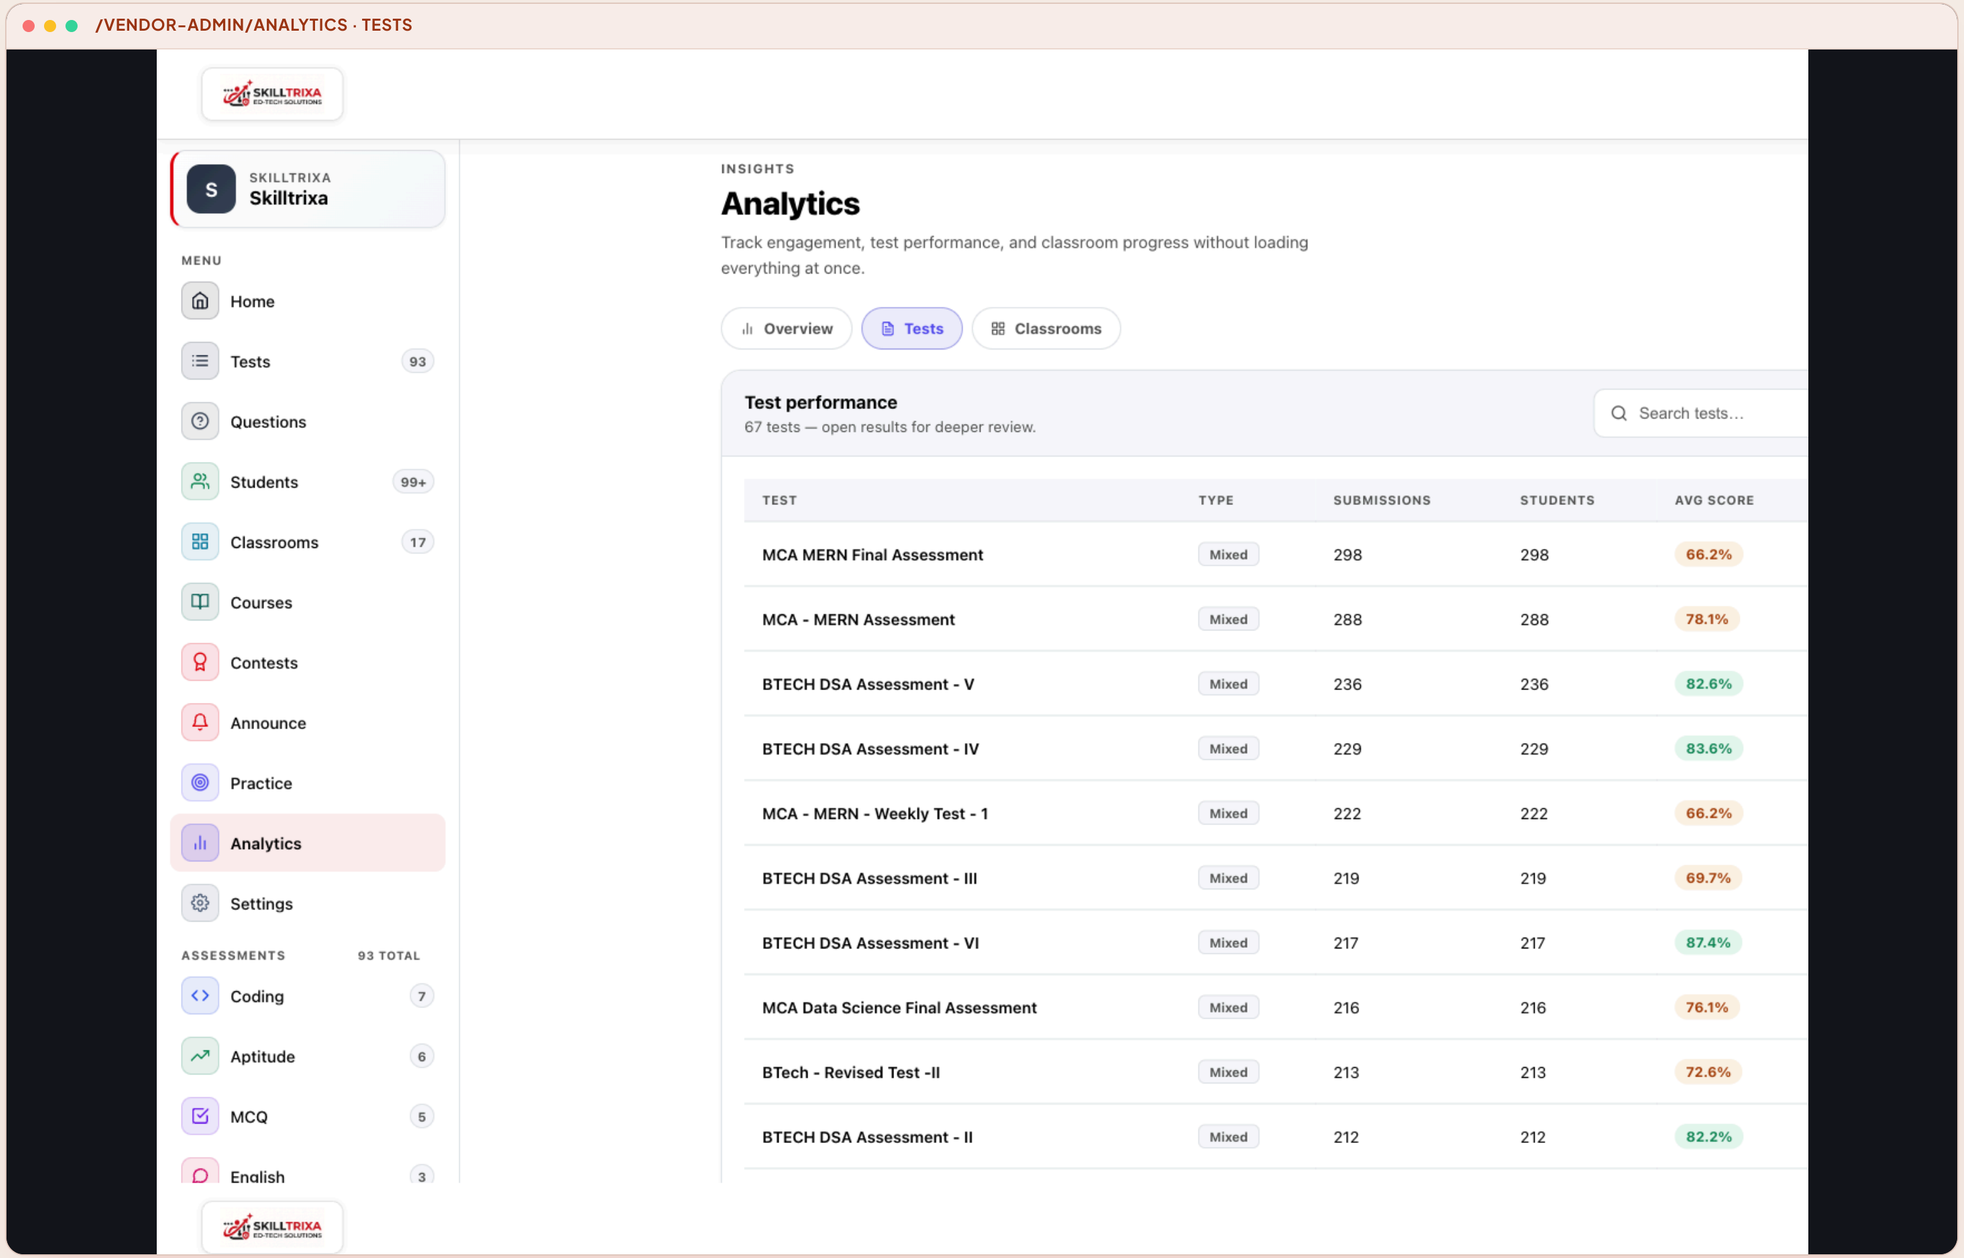

VENDOR ADMIN Analytics · Tests tab

Analytics by test

Every assessment with submissions, student count and average score. Open Results from any row.

- Every assessment with submissions and average score
- Student count per paper
- Sort by submissions or score
- Open Results from any row

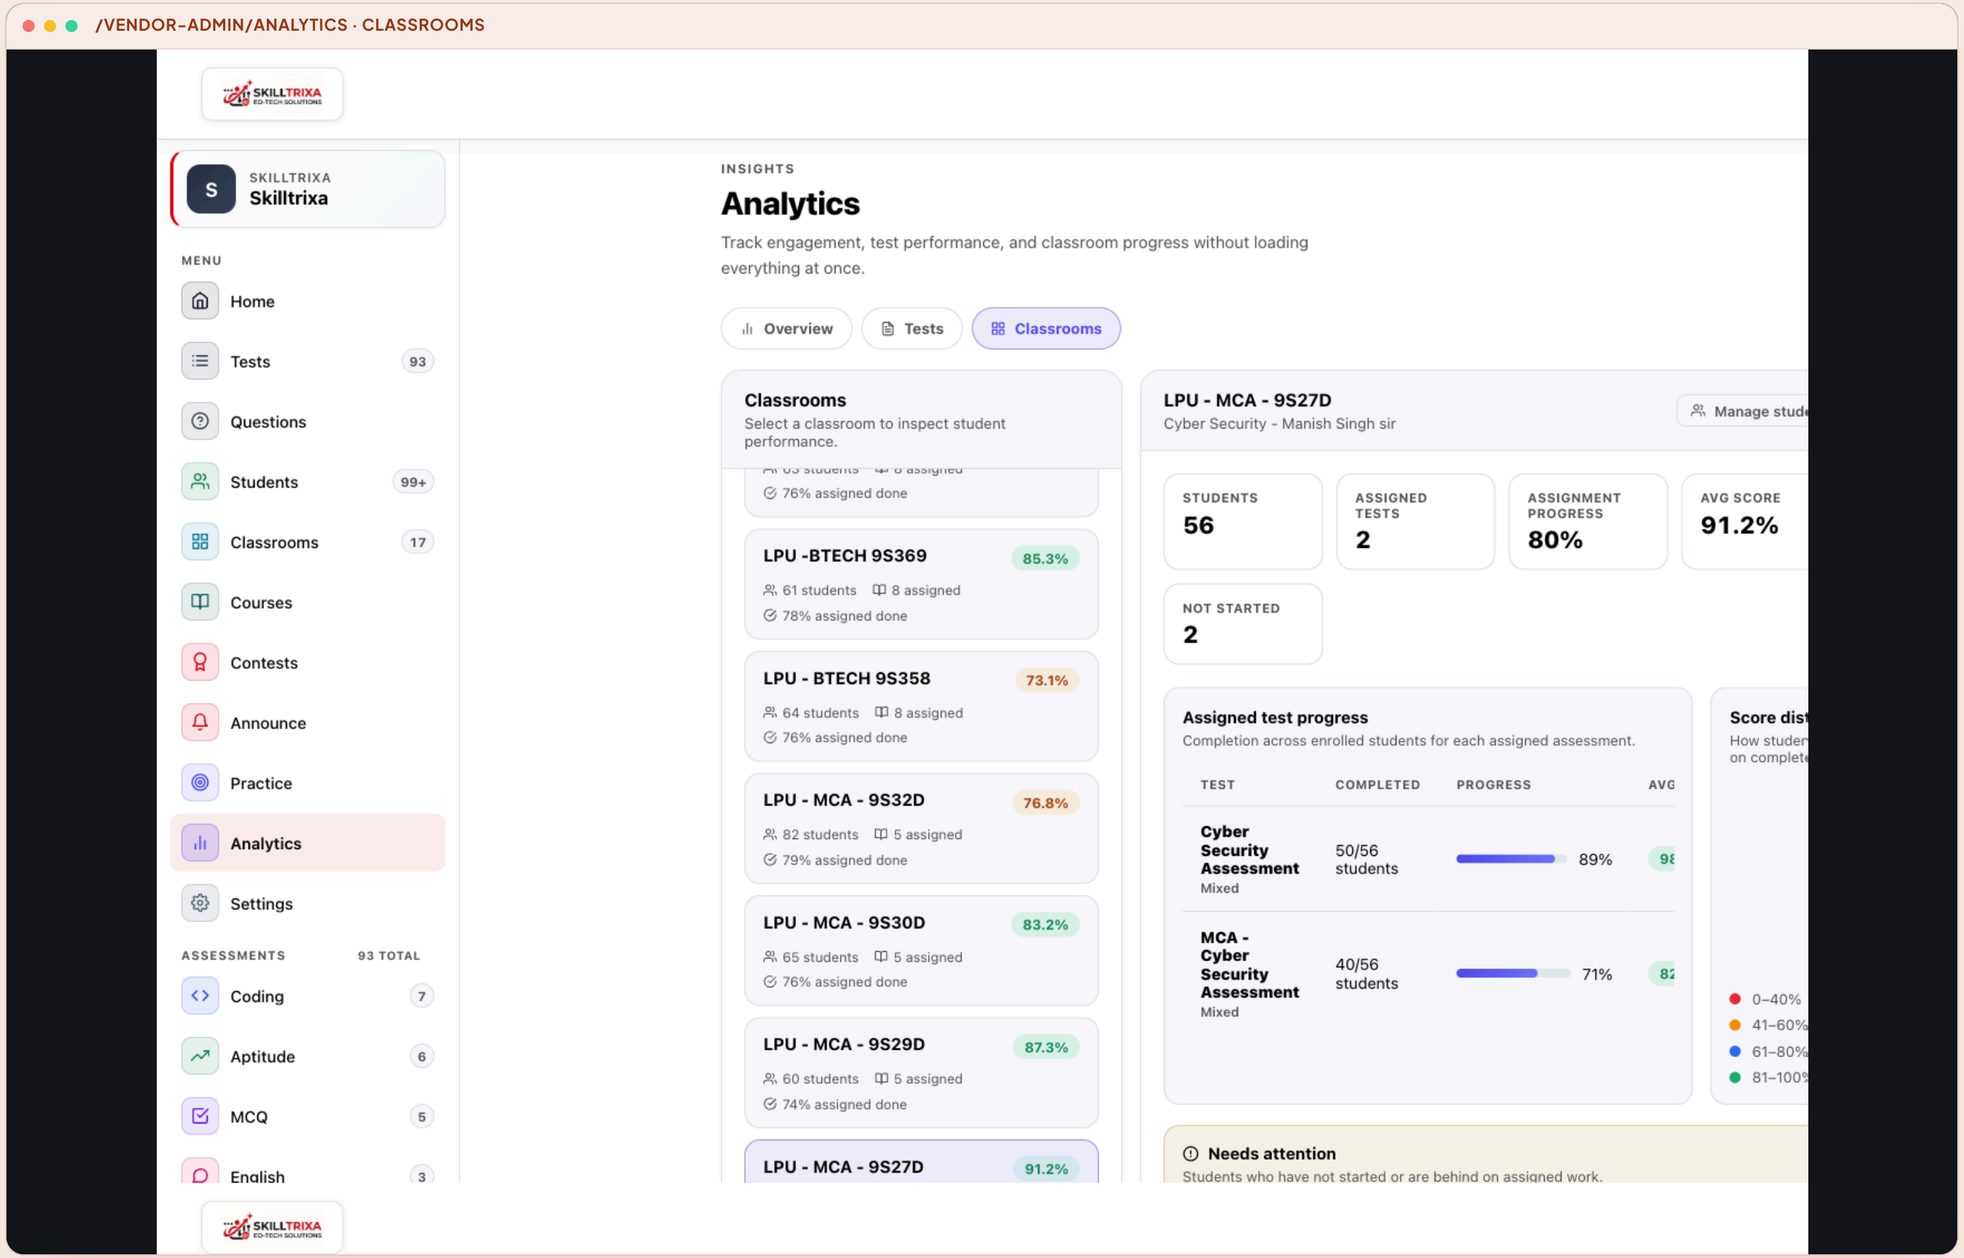

VENDOR ADMIN Analytics · Classrooms tab

Analytics by classroom

Select a section to see assigned-test progress, score distribution and roster.

- Pick a section to see assigned-test progress
- Score distribution and roster for that classroom
- Assigned test progress for the section
- Manage students / assigned tests from this view

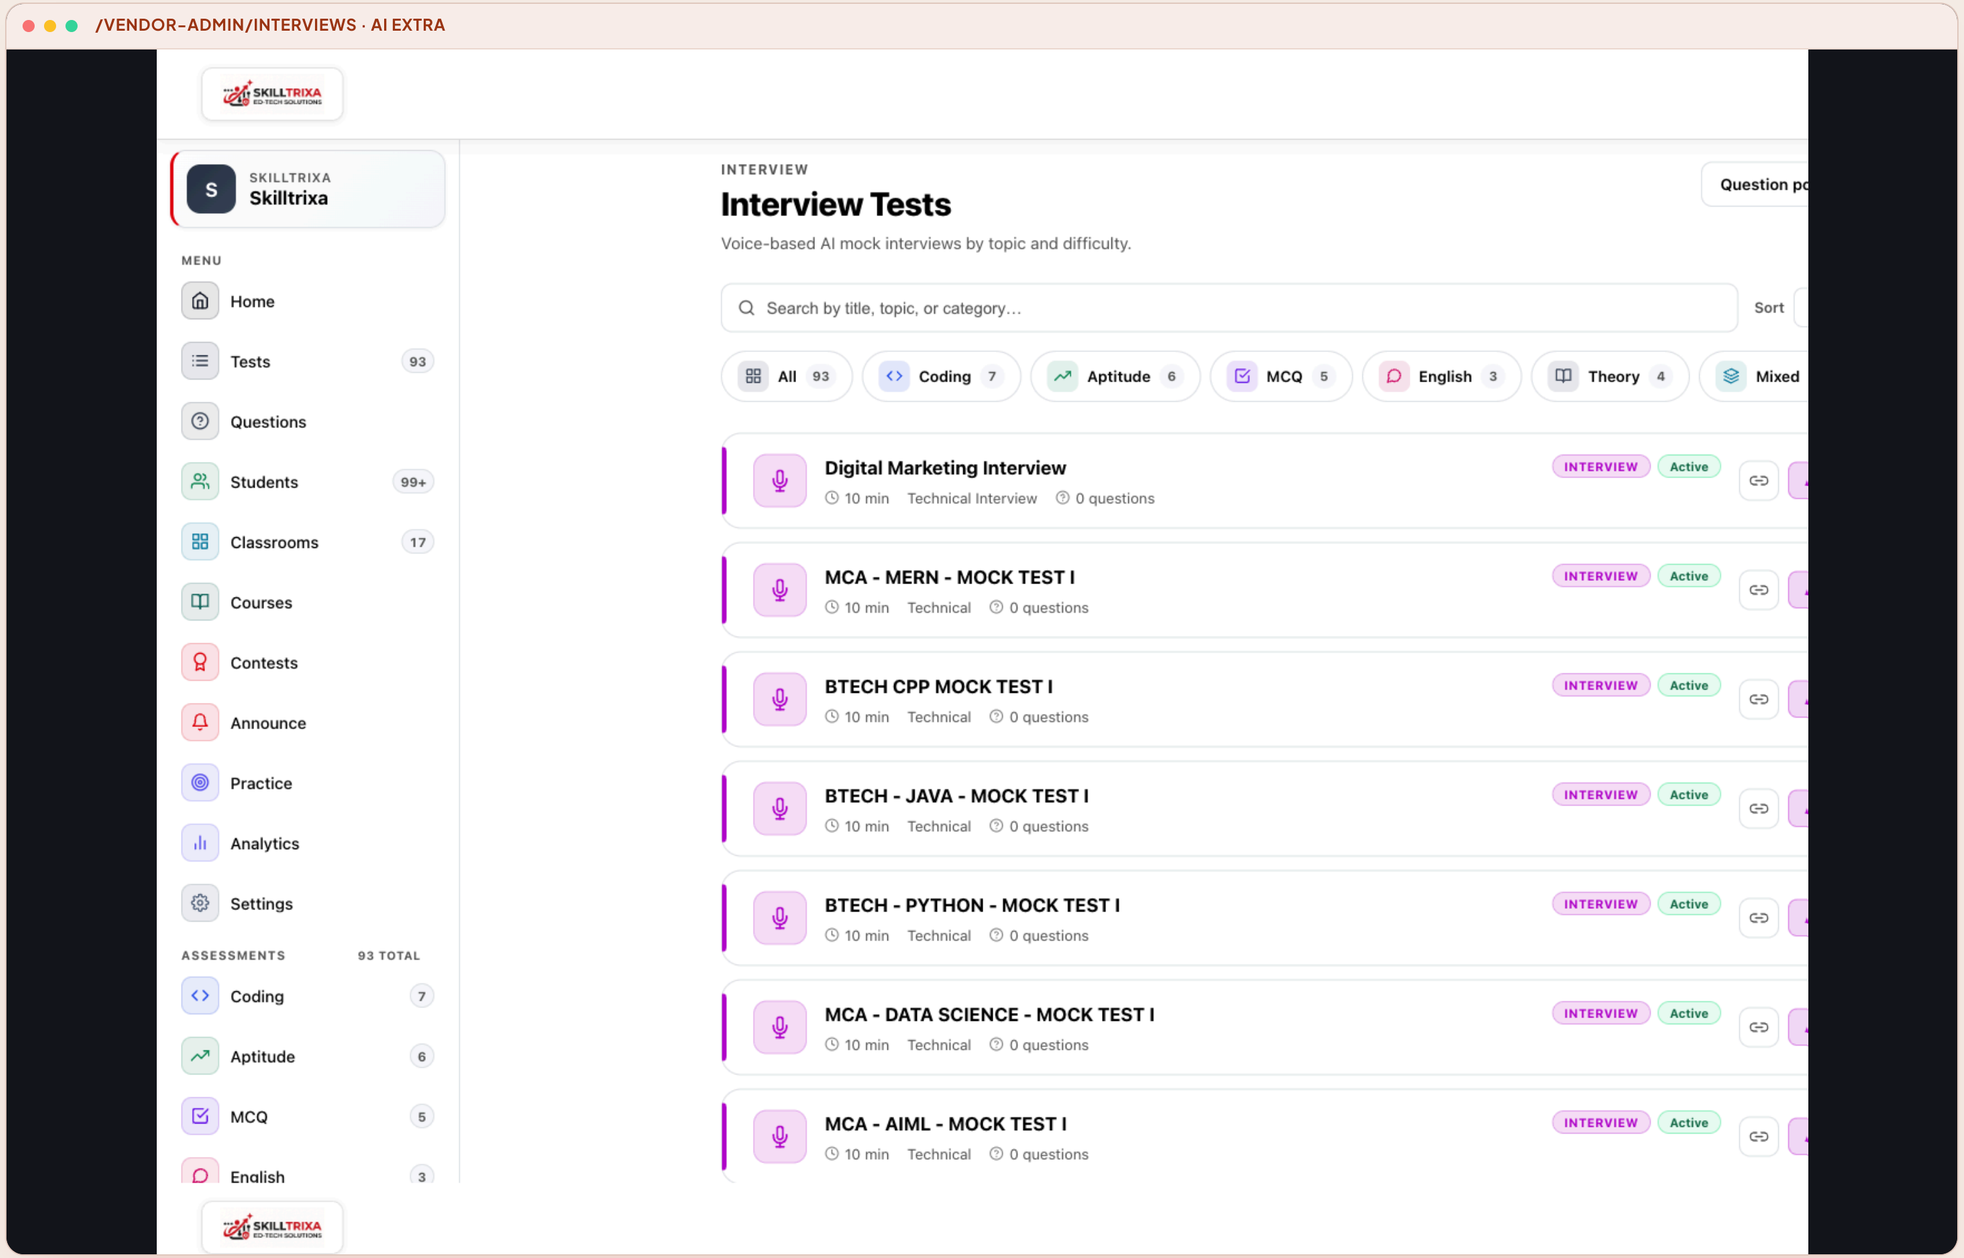

VENDOR ADMIN · AI EXTRA Not in the ₹399 seat — billed only when used

AI interviews

Voice interviews assigned like a test. Minutes are billed only when used. Turn interviews off and this line never appears on the invoice.

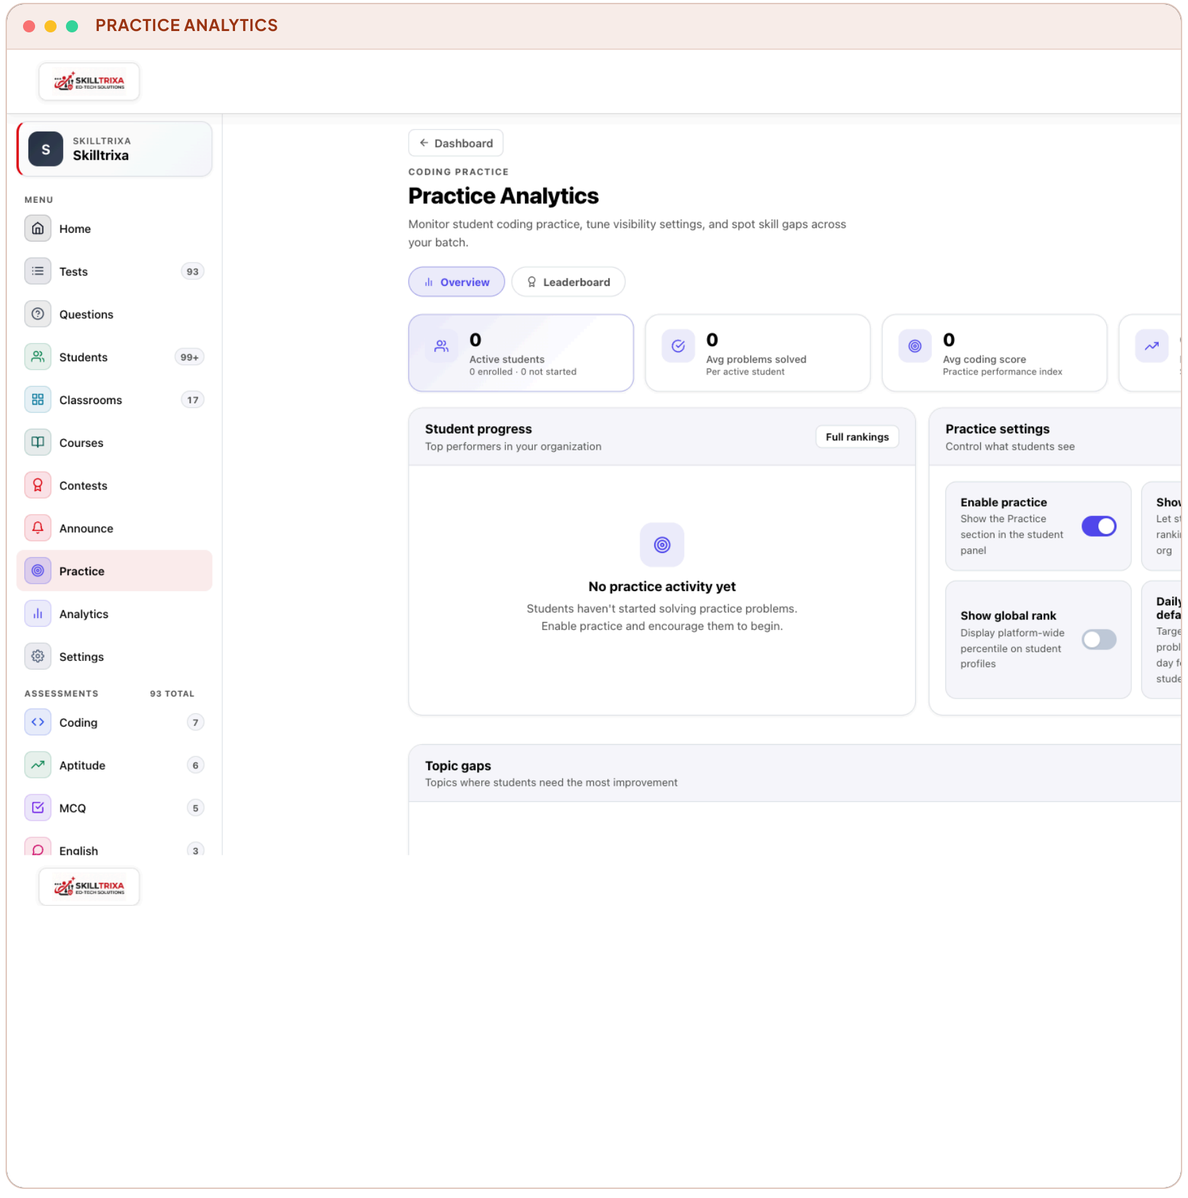

- Templates by topic: MERN, Java, C++, Python, DBMS and others
- Assign to classrooms; students take a voice session
- Transcript and AI score after the session
- Student live interview is Part 03, page 37

VENDOR ADMIN Two modules included in the ₹399 seat

Explain your architecture choices:

Describe why you chose these components and how they work together...

STUDENT PANEL · AI EXTRA

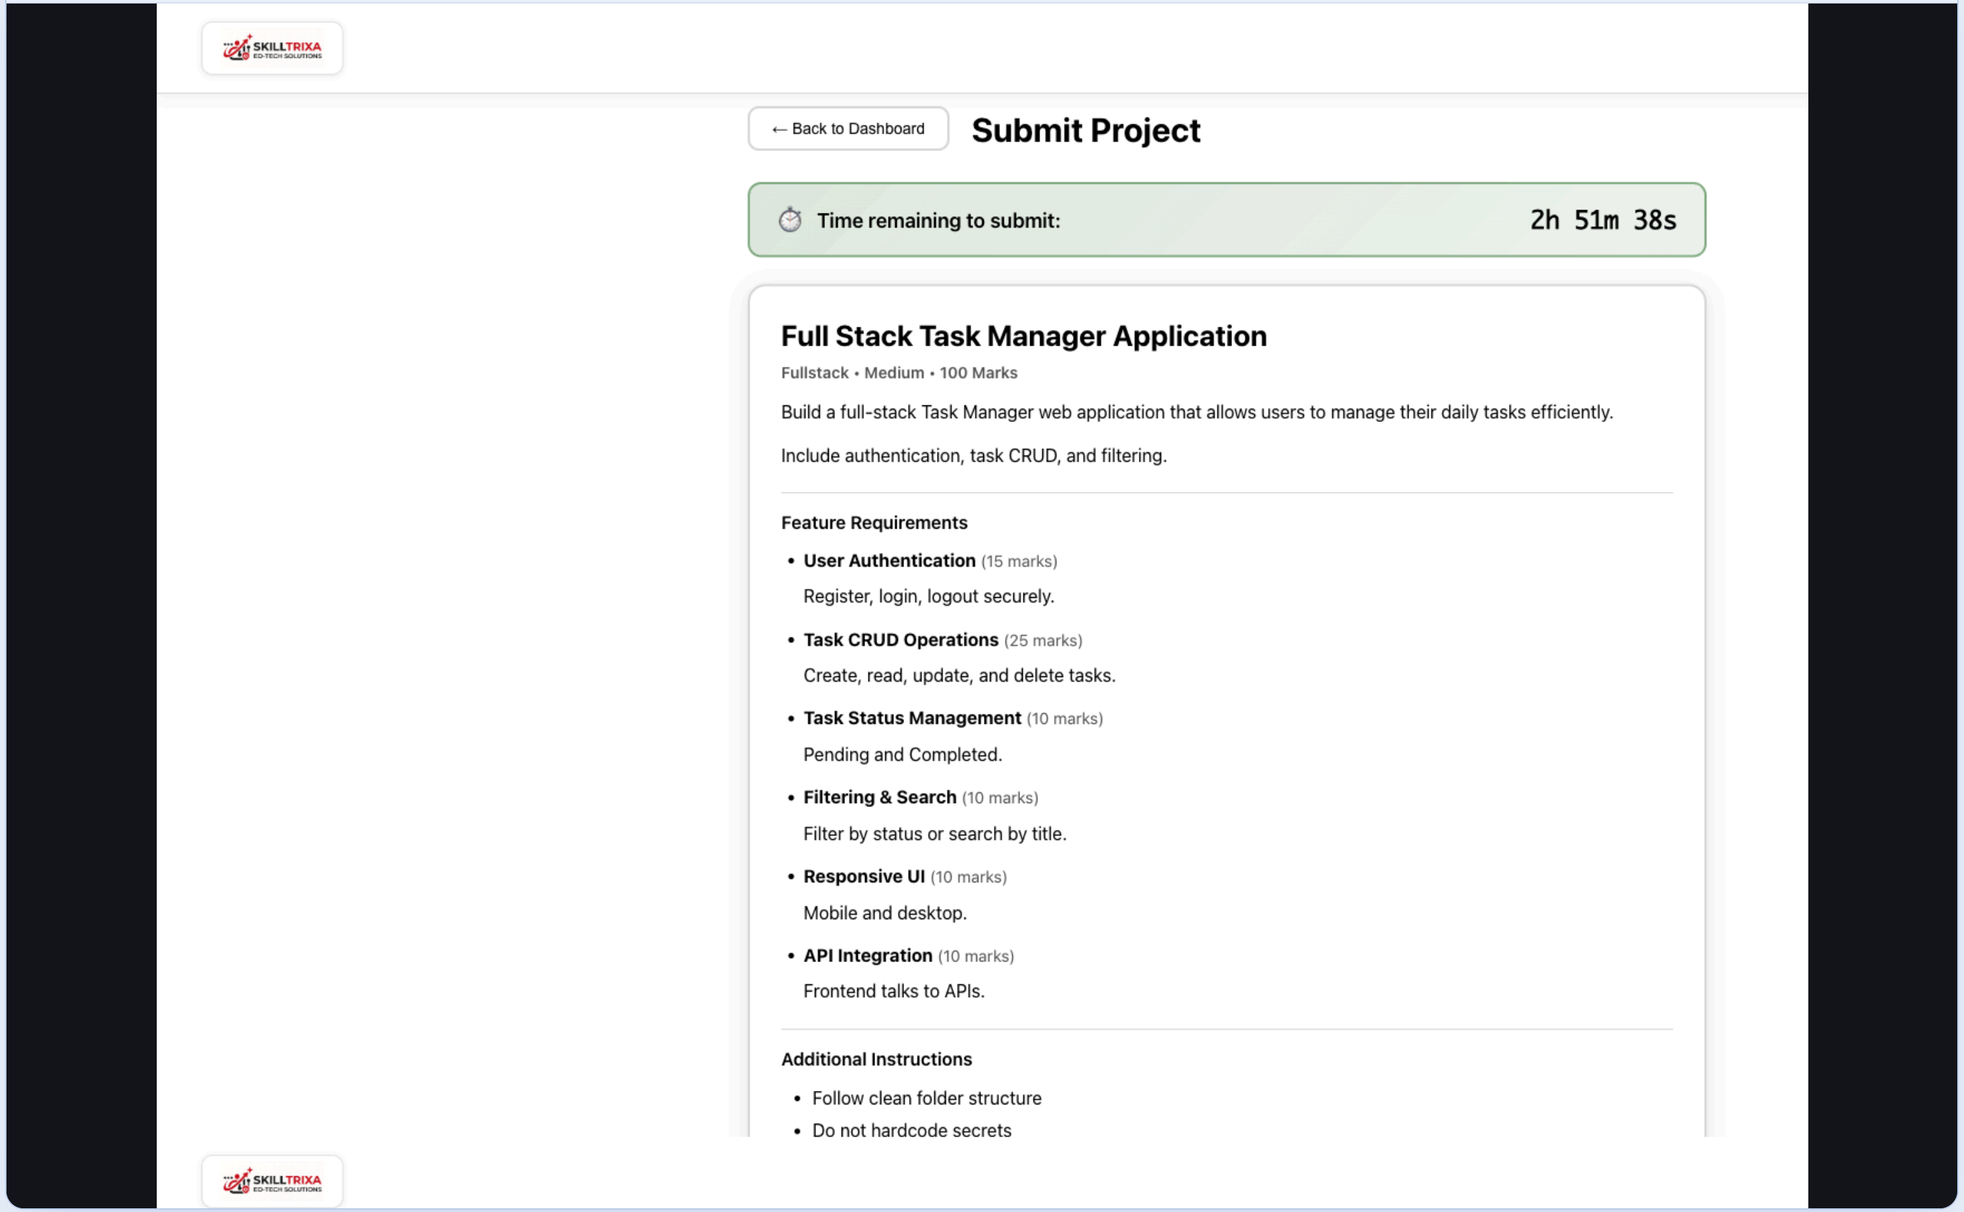

After Start assignment — brief, feature checklist, timer, GitHub submit

Taking a project exam

After Start assignment the timer runs. The student builds against the feature checklist and submits a GitHub (and live) URL. AI evaluation is billed to the vendor on usage.

- Timed window from the moment they start
- Feature requirements with marks on each item
- GitHub repo, branch, optional live URL
- No late commits after the timer ends

OPENED PROJECT · FULL STACK TASK MANAGER

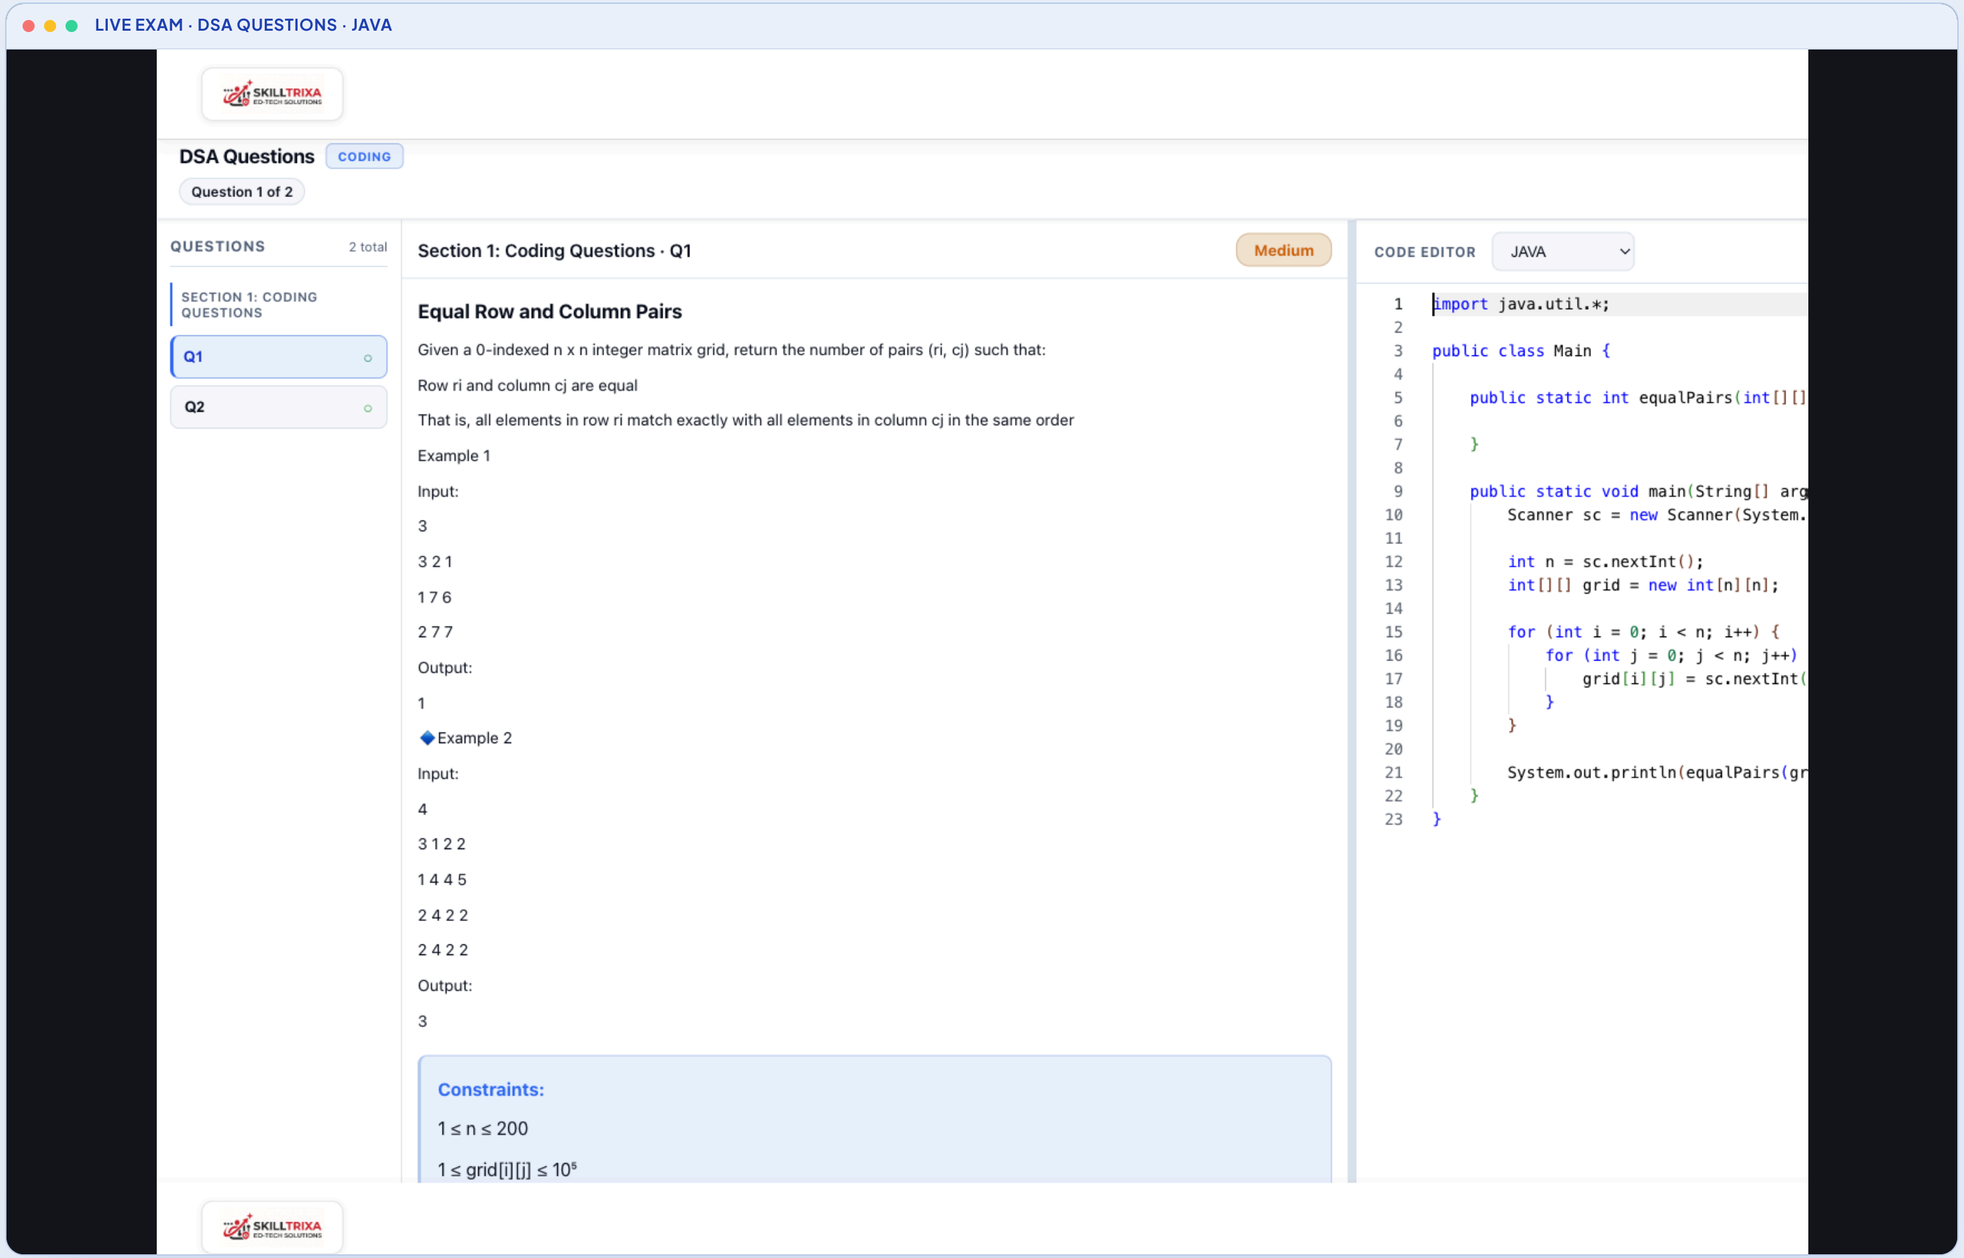

STUDENT · EXAM Live paper · DSA Questions · Equal Row and Column Pairs

Taking a coding exam

Statement on the left, Java editor on the right. Same judge as practice. Timer and violations in the header.

- Question statement on the left, editor on the right
- Java, C++, C or Python · Run · custom input · submit question
- Timer and violation count (0/5) in the header
- Question navigator (Q1, Q2) and next question

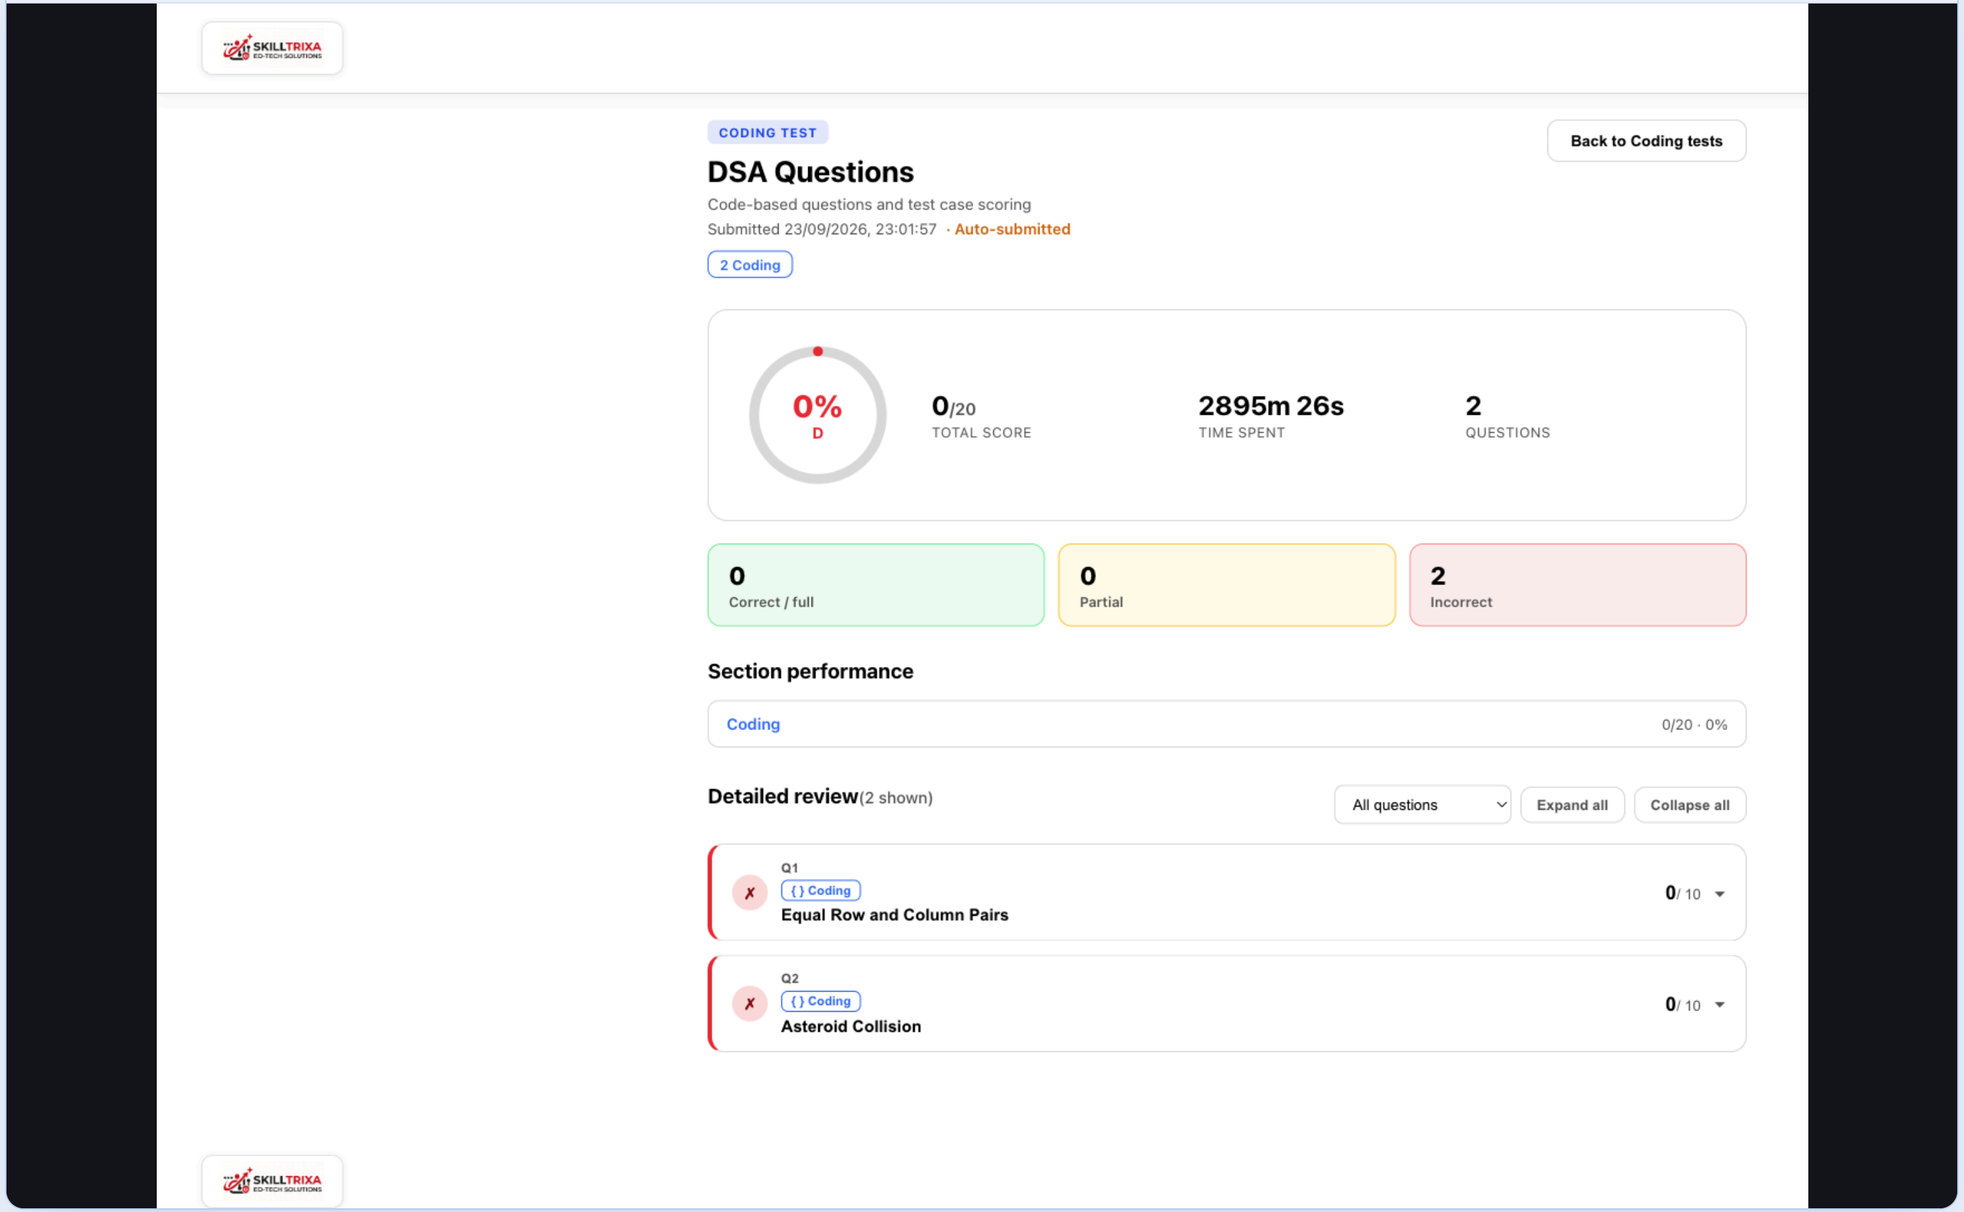

STUDENT PANEL End of student chapter · shown only if the vendor allows full review

Test result

Shown when the vendor allows full review. For placement tests, set the assessment to score only — answers and per-question review stay hidden.

- Total score, time spent, question count, violations
- Section performance (coding / MCQ / aptitude)
- Per-question marks and auto-submit reason if any
- Vendor results table is Part 02, page 21

STUDENT RESULT · FULL REVIEW

HOW THE PRODUCT IS USED

Vendor creates the paper. Student takes it. Vendor reviews it.

VENDOR ADMIN

Create, assign, review

The college or training partner owns the question bank, the roster and the result policy.

01
Add questions to the bank

02
Create coding, mixed, aptitude, MCQ…

03
Assign to a classroom

04
Open results and export

STUDENT PANEL

Take only assigned work

The student never sees the question bank. Only papers assigned to them appear after login.

01
Open the assigned type

02
Enter fullscreen

03
Write in the editor

04
Submit · see result if allowed

AI is optional. If any test uses AI (voice interview, project evaluation, or AI English speaking / essay / listening), that cost is paid by the vendor. Coding, aptitude, MCQ, theory, mixed, SQL, system design, practice and contests stay in the ₹399 seat.

COMMERCIALS

Platform licence and AI cost.

PLATFORM LICENCE

₹399 per student/year

GST extra. Charged on enrolled students for the year. Covers the vendor admin and student panel.

- ✓ Coding judge — Java, C++, C, Python
- ✓ English core — grammar, vocabulary, reading
- ✓ Practice hub and public contests
- ✓ Fullscreen exam + 5-violation cap
- ✓ Vendor logo and brand colours
- ✓ MCQ, aptitude, theory, mixed, SQL, system design
- ✓ Classrooms, bulk enroll, assign
- ✓ Courses in the same student login
- ✓ Results, export, analytics, analysis
- ✓ Vendor admin + student logins

PAID BY THE VENDOR

If any test uses AI, the vendor pays that cost.

AI is not in ₹399. The vendor turns it on only if they want it. Students are not billed.

- → Voice interviews (AI score and transcript)
- → AI project evaluation (GitHub / live URL)
- → AI English — speaking, essay, listening
- → Billed to the vendor on actual usage
- → Never added to the student fee

No AI used = no AI charge. GST extra on the platform licence.

NEW VENDOR

What enrolment looks like.

01

Vendor account

SkillTrixa creates the vendor on the platform. Logo and colours go on the student UI. Admin users get vendor-admin login.

- Tenant name and branding
- Vendor-admin users
- AI off until the vendor asks

02

Students & classrooms

Vendor bulk-enrolls the roster and maps classrooms to real sections. Students get their own login on the same tenant.

- Seat count = enrolled students
- Classroom per section
- Student cannot see vendor screens

03

Question bank

Vendor adds their own items, or uses allocated platform questions. Papers are built from this bank, not from a public list.

- Coding, MCQ, aptitude, English
- Create test from the bank
- Score-only or full review

04

First assessment

Vendor assigns a coding or mixed test to a classroom. Students sit the fullscreen exam. Vendor opens results and export.

- Assign → student dashboard
- Fullscreen + 5-violation cap
- Results, analysis, analytics

Vendor sends

- Enrolled student count for the year (seats)
- Logo, brand colours, admin names
- Classroom list (section / batch)
- Whether any test will use AI (vendor pays that cost)

SkillTrixa sets up

- Vendor tenant, branding, admin logins
- Walkthrough: question bank → test → assign → results
- Student login and fullscreen exam policy
- AI stays off unless the vendor enables it

Open a vendor account on SkillTrixa.

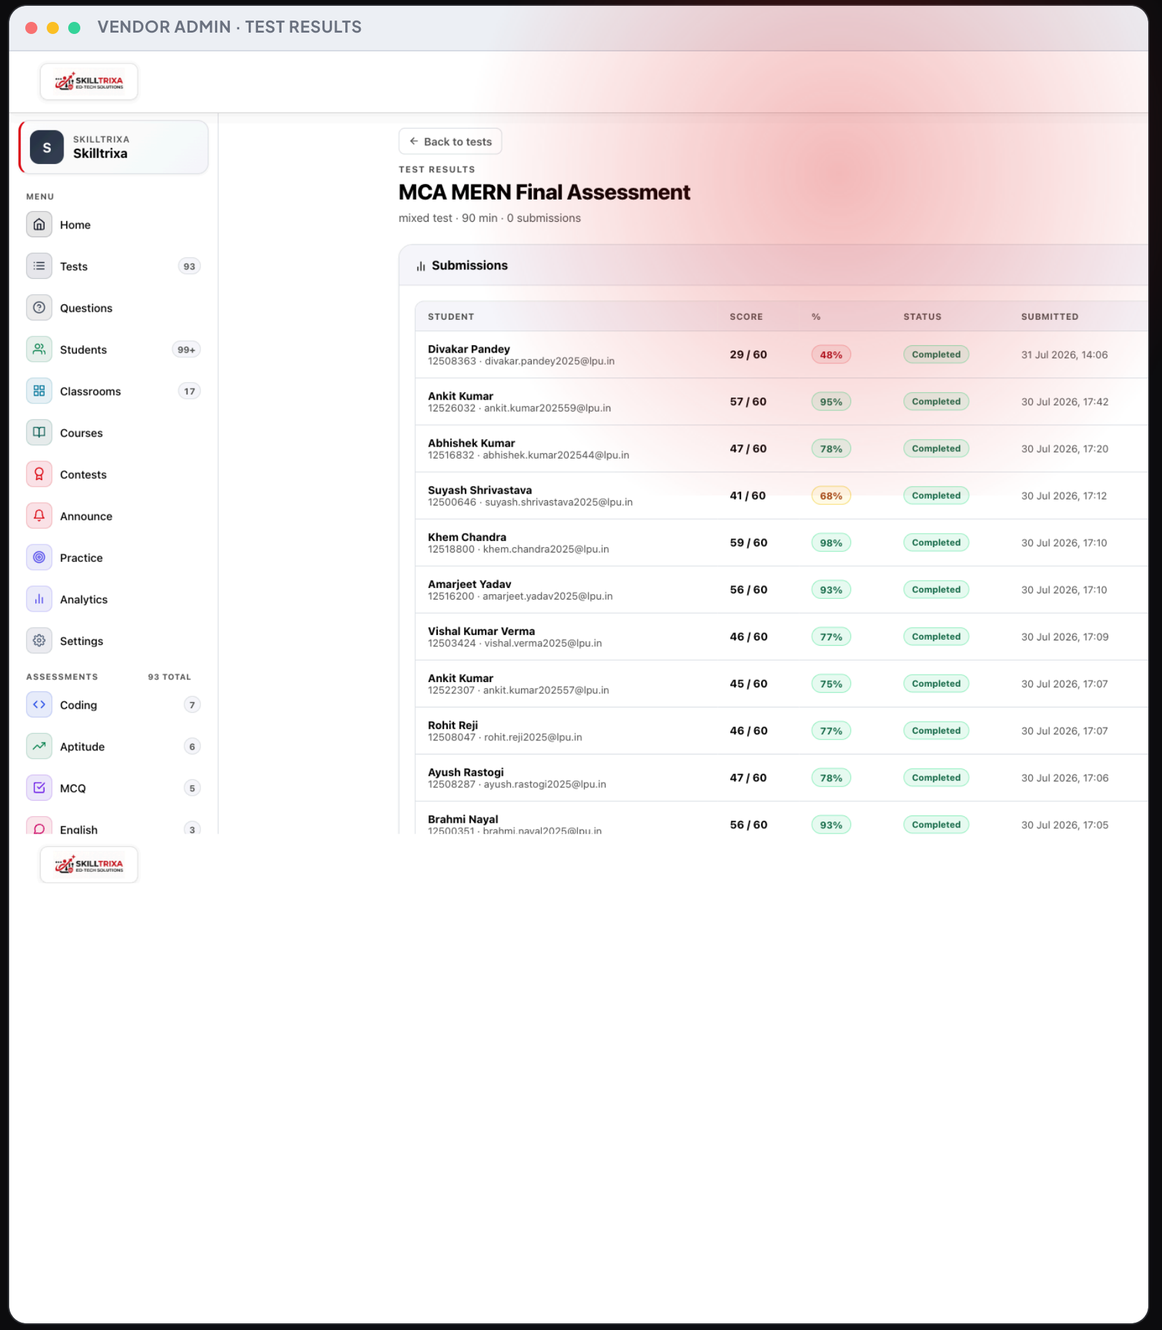

Licence is ₹399 per enrolled student per year, GST extra. If any test uses AI, that cost is paid by the vendor. Confirm seat count and we set up the tenant.

CLOSE

₹399 per student per year. GST extra.

If any test uses AI, that cost is paid by the vendor. Confirm enrolled student count and we open the tenant.

VENDOR ADMIN

College / partner workspace

Create questions and tests, enroll students, assign classrooms, and review results. Students never see these screens.

- Question bank and every test type
- Assign to a section or named students
- Per-student analysis
- Branding, practice, contests
- Classrooms and bulk enroll
- Results table and export
- Analytics by test and classroom
- Score-only or full review per paper

STUDENT PANEL

Enrolled learner workspace

Same tenant, different login. Only assigned work. No question bank, no other vendor's tests.

- Assigned coding, aptitude, MCQ, mixed
- Interviews and projects when assigned
- Fullscreen gate · 5-violation auto-submit
- Result review only if allowed
- English, theory, SQL / tools, system design
- Practice hub, same coding judge
- Java / C++ / C / Python editor
- Courses next to assigned tests
